PHASE I ENVIRONMENTAL SITE ASSESSMENT REPORT

Commercial Property

803 Main Street
Bradley Beach, New Jersey 07720

Report Date: May 16, 2019
Partner Project No. 19-245644.1

Prepared for:

Coastal Custom Builders LLC

506 B Ocean Avenue
Bradley Beach, New Jersey 07720

May 16, 2019

Mr. John Naples
Coastal Custom Builders LLC
506 B Ocean Avenue
Bradley Beach, New Jersey 07720

Subject: Phase I Environmental Site Assessment
Commercial Property
803 Main Street
Bradley Beach, New Jersey 07720
Partner Project No. 19-245644.1

Dear Mr. Naples:

Partner Engineering and Science, Inc. (Partner) is pleased to provide the results of the *Phase I Environmental Site Assessment* (Phase I ESA) report of the abovementioned address (the "subject property"). This assessment was performed in conformance with the scope and limitations as detailed in the ASTM Practice E1527-13 Standard Practice for Environmental Site Assessments: Phase I Environmental Site Assessment Process.

This assessment included a site reconnaissance as well as research and interviews with representatives of the public, property ownership, site manager, and regulatory agencies. An assessment was made, conclusions stated, and recommendations outlined.

We appreciate the opportunity to provide environmental services to you. If you have any questions concerning this report, or if we can assist you in any other matter, please contact me at (443) 394-6590.

Sincerely,

Doreen T. Spinoso, EP
Principal; Managing Director

EXECUTIVE SUMMARY

Partner Engineering and Science, Inc. (Partner) has performed a Phase I Environmental Site Assessment (ESA) in accordance with the scope of work and limitations of ASTM Standard Practice E1527-13, the Environmental Protection Agency Standards and Practices for All Appropriate Inquiries (AAI) (40 CFR Part 312) and set forth by Coastal Custom Builders LLC for the property located at 803 Main Street in Bradley Beach, Monmouth County, New Jersey (the "subject property"). The Phase I Environmental Site Assessment is designed to provide Coastal Custom Builders LLC with an assessment concerning environmental conditions (limited to those issues identified in the report) as they exist at the subject property.

Property Description

The subject property is located on the west side of Main Street within a mixed commercial and residential area of Monmouth County. Please refer to the table below for further description of the subject property:

Subject Property Data

Address:	803 Main Street, Bradley Beach, New Jersey
Historical Addresses:	113 South Main Street; 212 Main Street; 214 Main Street; J Main Street; 805 Main Street; 805 ½ Main Street
Property Use:	Commercial and Residential
Land Acreage (Ac):	0.12
Number of Buildings:	One (1)
Number of Floors:	Two (2) with a basement
Gross Building Area (SF):	1,770
Date of Construction:	<i>circa</i> 1930 with an addition <i>circa</i> 1953
Block-Lot:	32-18
Type of Construction:	Concrete slab, wood framed with a brick façade
Current Tenants:	Vacant
Site Assessment Performed By:	Taylor Rodenberg of Partner
Site Assessment Conducted On:	May 9, 2019

The subject property is currently developed with a vacant, two-story structure formerly utilized for mixed commercial and residential use. There are no current onsite operations. In addition to the current structure, the subject property is also improved with a backyard area, public sidewalk and driveway area.

According to available historical sources, the subject property was formerly undeveloped as early as 1888; utilized for residential purposes between 1890 and 1905; and utilized for commercial and residential purposes since *circa* 1930. Tenants on the subject property include, but are not limited to, La Petit Beauty Salon (1972); David's Place for Hair Styles (1975); JOB (1982); Residential (1987-2010); General Electronics Communications (1987-1992); Accurate Locksmiths Corp. (1992-1995); and Atlantic Lock & Safe Inc. (2000-2005).

The immediately surrounding properties consist of Autotek and a vacant lot to the north; Chinatown Kitchen to the south; Pagano's UVA Restaurant to the east across Main Street; and United Engine & Truck to the west.

According to the United States Geological Service (USGS) and topographic map interpretation, the depth to groundwater in the vicinity of the subject property is inferred to be approximately 30 to 60 feet below ground surface (bgs) and groundwater flow is inferred to be toward the east-northeast.

Findings

A *recognized environmental condition (REC)* refers to the presence or likely presence of any hazardous substances or petroleum products in, on, or at a property: due to release to the environment; under conditions indicative of a release to the environment; or under conditions that pose a material threat of a future release to the environment.

- Partner did not identify any RECs during the course of this assessment.

A *controlled recognized environmental condition (CREC)* refers to a REC resulting from a past release of hazardous substances or petroleum products that has been addressed to the satisfaction of the applicable regulatory authority, with hazardous substances or petroleum products allowed to remain in place subject to the implementation of required controls.

- Partner did not identify any CRECs during the course of this assessment.

A *historical recognized environmental condition (HREC)* refers to a past release of any hazardous substances or petroleum products that has occurred in connection with the property and has been addressed to the satisfaction of the applicable regulatory authority or meeting unrestricted use criteria established by a regulatory authority, without subjecting the property to any required controls.

- Partner did not identify any HRECs during the course of this assessment.

An *environmental issue* refers to environmental concerns identified by Partner, which do not qualify as RECs; however, warrant further discussion.

- Partner observed a 275-gallon heating oil aboveground storage tank (AST) on the southern portion of the subject property. The AST was installed on an unknown date and was not equipped with any forms of secondary containment. The AST was observed to be in average to fair condition with no signs of leak, stains or spills in the vicinity. Based on the conditions observed, the AST is not expected to represent a significant environmental concern at this time.
- During the onsite reconnaissance, several pipes were observed along the rear (western) portion of the subject building. The pipes were threaded through a recently poured concrete landing. No additional information regarding the pipes was provided during the course of this assessment. Since the subject property was heated by natural gas, Partner opines that these conduits are likely to be used for electric, communication and/or plumbing systems being installed or updated. In addition, no records regarding underground storage tanks (USTs) were identified during a review of the agency documentation and regulatory database report. Based on the above, the pipes are not expected to represent a significant environmental concern at this time. However, should any UST(s) be encountered during redevelopment activities, the tank(s) should be properly removed in accordance with state and local regulations.

- Due to the age of the subject property building, there is a potential that asbestos-containing material (ACM) and/or lead-based paint (LBP) are present. Overall, suspect ACMs and painted surfaces were observed to be in good condition and do not pose a health and safety concern at this time. Should these materials be replaced, the identified suspect ACMs and painted surfaces would need to be sampled to confirm the presence or absence of asbestos and lead prior to any renovation or demolition activities to prevent potential exposure to workers and/or building occupants.
- Radon is a colorless, odorless, naturally occurring, radioactive, inert, gaseous element formed by radioactive decay of radium atoms. Review of the EPA Map of Radon Zones places the subject property in Zone 1, where average predicted radon levels exceed the EPA's action level of 4.0 picoCuries per Liter (pCi/L). The subject building is currently vacant; as such, radon sampling was not conducted as part of this assessment.

Conclusions, Opinions and Recommendations

Partner has performed a Phase I Environmental Site Assessment in conformance with the scope and limitations of ASTM Practice E1527-13 of 803 Main Street in Bradley Beach, Monmouth County, New Jersey (the "subject property"). Any exceptions to, or deletions from, this practice are described in Section 1.5 of this report.

This assessment has revealed no evidence of RECs in connection with the subject property; however, environmental issues were identified. Based on the conclusions of this assessment, Partner recommends the following:

- If no longer in use, the AST should be properly removed and disposed of in accordance with state and local regulations.
- Operations and Maintenance (O&M) Programs should be implemented in order to safely manage the suspect ACMs and LBP located at the subject property.
- If the subject property is redeveloped for residential use in the future, radon sampling should be conducted in order to confirm if elevated radon levels are present.

1.0 INTRODUCTION

Partner Engineering and Science, Inc. (Partner) has performed a Phase I Environmental Site Assessment (ESA) in conformance with the scope and limitations of ASTM Standard Practice E1527-13 and the Environmental Protection Agency Standards and Practices for All Appropriate Inquiries (AAI) (40 CFR Part 312) for the property located at 803 Main Street in Bradley Beach, Monmouth County, New Jersey (the "subject property"). Any exceptions to, or deletions from, this scope of work are described in the report.

1.1 Purpose

The purpose of this ESA is to identify existing or potential Recognized Environmental Conditions (as defined by ASTM Standard E1527-13) affecting the subject property that: 1) constitute or result in a material violation or a potential material violation of any applicable environmental law; 2) impose any material constraints on the operation of the subject property or require a material change in the use thereof; 3) require clean-up, remedial action or other response with respect to Hazardous Substances or Petroleum Products on or affecting the subject property under any applicable environmental law; 4) may affect the value of the subject property; and 5) may require specific actions to be performed with regard to such conditions and circumstances. The information contained in the ESA Report will be used by Client to: 1) evaluate its legal and financial liabilities for transactions related to foreclosure, purchase, sale, loan origination, loan workout or seller financing; 2) evaluate the subject property's overall development potential, the associated market value and the impact of applicable laws that restrict financial and other types of assistance for the future development of the subject property; and/or 3) determine whether specific actions are required to be performed prior to the foreclosure, purchase, sale, loan origination, loan workout or seller financing of the subject property.

This ESA was performed to permit the *User* to satisfy one of the requirements to qualify for the innocent landowner, contiguous property owner, or bona fide prospective purchaser limitations on scope of Comprehensive Environmental Response, Compensation and Liability Act (CERCLA) (42 U.S.C. §9601) liability (hereinafter, the "*landowner liability protections*," or "*LLPs*"). ASTM Standard E1527-13 constitutes "*all appropriate inquiry* into the previous ownership and uses of the *property* consistent with good commercial or customary practice" as defined at 42 U.S.C. §9601(35)(B).

1.2 Scope of Work

The scope of work for this ESA is in accordance with the requirements of ASTM Standard E1527-13. This assessment included: 1) a property and adjacent site reconnaissance; 2) interviews with key personnel; 3) a review of historical sources; 4) a review of regulatory agency records; and 5) a review of a regulatory database report provided by a third-party vendor. Partner contacted local agencies, such as environmental health departments, fire departments and building departments in order to determine any current and/or former hazardous substances usage, storage and/or releases of hazardous substances on the subject property. Additionally, Partner researched information on the presence of activity and use limitations (AULs) at these agencies.

As defined by ASTM E1527-13, AULs are the legal or physical restrictions or limitations on the use of, or access to, a site or facility: 1) to reduce or eliminate potential exposure to hazardous substances or petroleum products in the soil or groundwater on the subject property; or 2) to prevent activities that could interfere with the effectiveness of a response action, in order to ensure maintenance of a condition of no significant risk to public health or the environment. These legal or physical restrictions, which may include institutional and/or engineering controls (IC/ECs), are intended to prevent adverse impacts to individuals or populations that may be exposed to hazardous substances and petroleum products in the soil or groundwater on the property.

If requested by Client, this report may also include the identification, discussion of, and/or limited sampling of asbestos-containing materials (ACMs), lead-based paint (LBP), mold, and/or radon.

1.3 Limitations

Partner warrants that the findings and conclusions contained herein were accomplished in accordance with the methodologies set forth in the Scope of Work. These methodologies are described as representing good commercial and customary practice for conducting an ESA of a property for the purpose of identifying recognized environmental conditions. There is a possibility that even with the proper application of these methodologies there may exist on the subject property conditions that could not be identified within the scope of the assessment or which were not reasonably identifiable from the available information. Partner believes that the information obtained from the record review and the interviews concerning the subject property is reliable. However, Partner cannot and does not warrant or guarantee that the information provided by these other sources is accurate or complete. The conclusions and findings set forth in this report are strictly limited in time and scope to the date of the evaluations. The conclusions presented in the report are based solely on the services described therein, and not on scientific tasks or procedures beyond the scope of agreed-upon services or the time and budgeting restraints imposed by the Client. No other warranties are implied or expressed.

Some of the information provided in this report is based upon personal interviews, and research of available documents, records, and maps held by the appropriate government and private agencies. This report is subject to the limitations of historical documentation, availability, and accuracy of pertinent records, and the personal recollections of those persons contacted.

This practice does not address requirements of any state or local laws or of any federal laws other than the all appropriate inquiry provisions of the LLPs. Further, this report does not intend to address all of the safety concerns, if any, associated with the subject property.

Environmental concerns, which are beyond the scope of a Phase I ESA as defined by ASTM include the following: ACMs, LBP, radon, and lead in drinking water. These issues may affect environmental risk at the subject property and may warrant discussion and/or assessment; however, are considered non-scope issues. If specifically requested by the Client, these non-scope issues are discussed in Section 6.3.

1.4 User Reliance

Coastal Custom Builders LLC engaged Partner to perform this assessment in accordance with an agreement governing the nature, scope and purpose of the work as well as other matters critical to the engagement. All reports, both verbal and written, are for the sole use and benefit of Coastal Custom Builders LLC. Either verbally or in writing, third parties may come into possession of this report or all or part of the information generated as a result of this work. In the absence of a written agreement with Partner granting such rights, no third parties shall have rights of recourse or recovery whatsoever under any course of action against Partner, its officers, employees, vendors, successors or assigns. Any such unauthorized user shall be responsible to protect, indemnify and hold Partner, Client and their respective officers, employees, vendors, successors and assigns harmless from any and all claims, damages, losses, liabilities, expenses (including reasonable attorneys' fees) and costs attributable to such Use. Unauthorized use of this report shall constitute acceptance of and commitment to these responsibilities, which shall be irrevocable and shall apply regardless of the cause of action or legal theory pled or asserted. Additional legal penalties may apply.

1.5 Limiting Conditions

The findings and conclusions contain all of the limitations inherent in these methodologies that are referred to in ASTM E1527-13.

Specific limitations and exceptions to this ESA are more specifically set forth below:

- Interviews with past or current owners, operators and occupants were not reasonably ascertainable and thus constitute a data gap. Based on information obtained from other historical sources (as discussed in Section 3.0), this data gap is not expected to alter the findings of this assessment.
- Information relative to deed restrictions and environmental liens, a title search, and completion of a pre-survey questionnaire was not provided at the time of the assessment. Based on information obtained from other historical sources (as discussed in Section 3.0), this data gap is not expected to alter the findings of this assessment.
- Partner was unable to determine the property use at five-year intervals, which constitutes a data gap. Except for property tax files and recorded land title records, which were not considered to be sufficiently useful, Partner reviewed all standard historical sources and conducted appropriate interviews.

The Client has requested the report despite the above-listed limitations.

2.0 SITE DESCRIPTION

2.1 Site Location and Legal Description

The subject property at 803 Main Street in Bradley Beach, New Jersey is located on the west side of Main Street. According to the Monmouth County Board of Taxation, the subject property is identified as Block 32, Lot 18, and ownership is currently vested in Mr. Mark Daugherty.

Please refer to Figure 1: Site Location Map, Figure 2: Site Plan, Figure 3: Topographic Map, and Appendix A: Site Photographs for the location and site characteristics of the subject property.

2.2 Current Property Use

The subject property is currently developed with a vacant, two-story structure formerly utilized for mixed commercial and residential use. There are no current onsite operations. The subject property consists of a two-story building with a basement located on the south side of the property. In addition to the current structure, the subject property is also improved with a backyard area, public sidewalk and driveway area.

The subject property is designated for general business development by the Borough of Bradley Beach.

The subject property was identified as a NJ Spills site in the regulatory database report, as further discussed in Section 4.2.

2.3 Current Use of Adjacent Properties

The subject property is located within a mixed commercial and residential area of Monmouth County. During the vicinity reconnaissance, Partner observed the following land use on properties in the immediate vicinity of the subject property:

Immediately Surrounding Properties

North: Autotek (811 Main Street) and a vacant lot (817 Main Street)

South: Chinatown Kitchen (801 Main Street)

East: Main Street beyond which is Pagano's UVA Restaurant (800-806 Main Street)

West: United Engine & Truck (725 Main Street)

The adjacent property to the north was identified as an US Historic Auto, NJ Underground Storage Tank (UST), NJ Historic (HIST) Leaking Underground Storage Tank (LUST) and New Jersey Environmental Management System (NJEMS) site; and the adjacent property to the west was identified as a NJ UST site in the regulatory database report of Section 4.2.

2.4 Physical Setting Sources

2.4.1 Topography

The United States Geological Survey (USGS) *Asbury Park, New Jersey, New Jersey* Quadrangle 7.5-minute series topographic map was reviewed for this ESA. According to the contour lines on the topographic map, the subject property is located at approximately 20 feet above mean sea level (MSL). The contour lines in the area of the subject property indicate the area is sloping gently towards the east. The subject property is depicted on the 2014 map as situated within a developed area in which only structures typically associated with institutional, religious, and large commercial/industrial facilities are portrayed.

A copy of the most recent topographic map is included as Figure 3 of this report.

2.4.2 Hydrology

According to topographic map interpretation, the direction of groundwater flow in the vicinity of the subject property is inferred to be toward the east-northeast. The nearest surface water in the vicinity of the subject property is Fletcher Lake located approximately 1,854 feet northeast of the subject property. No settling ponds, lagoons, surface impoundments, wetlands or natural catch basins were observed at the subject property during this assessment.

According to available information, a public water system operated by New Jersey American Water (NJAW) serves the subject property vicinity. Reportedly, shallow groundwater beneath the subject property is not utilized for domestic purposes. The sources of public water for the Borough of Bradley Beach are groundwater from the Potomac-Raritan-Magothy Aquifer and surface water from the Glendola, Manasquan and Swimming Rivers Reservoirs and the Manasquan, Shark and Swimming Rivers.

Information specific to the subject property regarding the depth to groundwater and direction of groundwater flow was not available for the subject area. However, according to information obtained from the USGS, depth to the high-water table is anticipated between 30 and 60 feet below ground surface (bgs).

2.4.3 Geology/Soils

The subject property is located within the Coastal Plain physiographic province of the State of New Jersey. According to the USGS, this province is characterized by areas of low relief and consists of inter-bedded layers of sand, shells, gravel, silt, and clay sediments that range in age from Jurassic to Holocene. The sequence is generally wedge-shaped and dips and thickens eastward.

Based on information obtained from the United States Department of Agriculture (USDA) Natural Resources Conservation Service Web Soil Survey online database, the subject property is mapped as Urban land. Urban land is described as an area where more than 85% of the surface is covered by asphalt, concrete, buildings, or other impervious surfaces. Soils and foundation materials are highly variable. Urban structures and works cover so much of this land type that identification of the soils is not practical. Most areas have been smoothed and the original soil material has been disturbed, filled over, or otherwise destroyed.

2.4.4 Flood Zone Information

Partner performed a review of the Flood Insurance Rate Map (FIRM), published by the Federal Emergency Management Agency (FEMA). According to Community Panel Number 34025C0334F, dated September 25, 2009, the subject property appears to be located in Zone X, areas determined to be outside the 0.2% chance annual floodplain.

3.0 HISTORICAL INFORMATION

Partner obtained historical use information about the subject property from a variety of sources. A chronological listing of the historical data found is summarized in the table below:

Historical Use Information		
Period/Date	Source	Description/Use
1888	Topographic Map	Undeveloped
1890-1905	Sanborn Maps, Topographic Maps	Residential
c. 1930-2017	Aerial Photographs, City Directories, Interviews, Sanborn Maps, Topographic Maps	Mixed Commercial and Residential
2017-Present	Interviews, Onsite Observations	Mixed Commercial and Residential (Vacant)

Tenants on the subject property include, but are not limited to, La Petit Beauty Salon (1972); David's Place for Hair Styles (1975); JOB (1982); Residential (1987-2010); General Electronics Communications (1987-1992); Accurate Locksmiths Corp. (1992-1995); and Atlantic Lock & Safe Inc. (2000-2005).

No potential environmental concerns were identified in association with the former use of the subject property.

3.1 Aerial Photograph Review

Partner obtained available aerial photographs of the subject property and surrounding area from Environmental Data Resources, Inc. (EDR) on April 25, 2019. The following was observed on the subject property and adjacent properties during the aerial photograph review:

Date:	1931	Scale:	1"=500'
Subject Property:	Appears to be developed with apparent commercial and/or residential structures		
North:	Appears to be developed with apparent commercial and/or residential structures and vacant land		
South:	Appears to be developed with two small apparent commercial structures		
East:	Appears to be developed with several apparent commercial structures across a road (Main Street)		
West:	Appears to be developed with an apparent commercial structure and vacant land		

Date:	1940	Scale:	1"=500'
Subject Property:	Appears to be developed with the current structure on the southern portion of the property and vacant land		
North:	Appears to be developed with apparent commercial and/or residential structures and vacant land		
South:	No significant changes visible		
East:	No significant changes visible		
West:	Appears to be developed with an apparent outbuilding and vacant land		

<i>Date:</i>	<i>1951, 1953, 1961</i>	<i>Scale:</i>	<i>1"=500'</i>
Subject Property:	No significant changes visible, except an apparent outbuilding is visible along the western portion of the property		
North:	Appears to be developed with an apparent commercial structure, and an apparent gasoline service station with a pump island		
South:	No significant changes visible		
East:	No significant changes visible		
West:	Appears to be developed with several apparent commercial structures and vacant land		

<i>Date:</i>	<i>1963</i>	<i>Scale:</i>	<i>1"=500'</i>
Subject Property:	No significant changes visible		
North:	Appears to be developed with an apparent gasoline service station with a pump island, and vacant land		
South:	No significant changes visible		
East:	No significant changes visible		
West:	No significant changes visible		

<i>Date:</i>	<i>1970</i>	<i>Scale:</i>	<i>1"=500'</i>
Subject Property:	No significant changes visible, except an apparent commercial and/or residential structure is visible along the northern portion of the property		
North:	No significant changes visible		
South:	No significant changes visible		
East:	No significant changes visible		
West:	Appears to be developed with a small apparent outbuilding and vacant land		

<i>Date:</i>	<i>1974, 1985</i>	<i>Scale:</i>	<i>1"=500'</i>
Subject Property:	Appears to be developed with the current structure on the southern portion of the property and vacant land		
North:	Appears to be developed with an apparent gasoline service station with a pump island, and parking lots		
South:	No significant changes visible		
East:	No significant changes visible		
West:	No significant changes visible		

<i>Date:</i>	<i>1995</i>	<i>Scale:</i>	<i>1"=500'</i>
Subject Property:	No significant changes visible		
North:	Appears to be developed with an apparent gasoline service station and vacant land		
South:	No significant changes visible		
East:	No significant changes visible		
West:	Appears to be vacant land		

<i>Date:</i>	<i>2006, 2010, 2013, 2017</i>	<i>Scale:</i>	<i>1"=500'</i>
Subject Property:	No significant changes visible		
North:	Appears to be developed with an apparent commercial structure, parking lots, and vacant land		
South:	No significant changes visible		

Date: 2006, 2010, 2013, 2017

Scale: 1"=500'

East: No significant changes visible

West: Appears to be developed with the current commercial structure

Copies of select aerial photographs are included in Appendix B of this report.

3.2 Fire Insurance Maps

Partner reviewed the collection of Sanborn Fire insurance maps from EDR on April 25, 2019. The following was observed on the subject property and adjacent properties during the fire insurance map review:

Date: 1890

Subject Property: Depicted as developed with two dwellings (addressed as 113 South Main Street)

North: Depicted as developed with several dwellings and outbuildings

South: Depicted as developed with a dwelling, carpenters' shop, and a stable

East: Depicted as undeveloped across South Main Street

West: Depicted as developed with a stable and undeveloped land

Date: 1905

Subject Property: Depicted as developed with two dwellings and with a portion of a dwelling (addressed as 212, 214 Main Street, J Main Street)

North: Depicted as developed with several dwellings and outbuildings

South: Depicted as developed with a dwelling, black smith, and vacant land

East: Depicted as developed with a store, stable and undeveloped land

West: Depicted as developed with a water tower and vacant land

Date: 1930

Subject Property: Depicted as developed with two dwellings, an office and with a portion of a storage shed and auto garage (addresses as 803-805 ½ Main Street)

North: Depicted as developed with several dwellings, stores and outbuildings

South: Depicted as developed with a store with a storage area

East: Depicted as developed with several stores and an auto garage

West: Depicted as developed with a water tank, a receiving basin, a storage shed, and vacant land

Date: 1950

Subject Property: Depicted as developed with an office, auto garage and vacant land (addressed as 803 Main Street)

North: Depicted as developed with a filling station and a laundry facility with a boiler room

South: No significant changes depicted, except the storage area is depicted as a shed

East: Depicted as developed with several stores and a storage shed

West: Depicted as developed with a concrete covered reservoir of 632,000-gallons, associated pump houses, and vacant land

Date: 1967

Subject Property: No significant changes depicted, except a one-story addition to the office has been constructed (addressed as 803-805 Main Street)

North: Depicted as developed with a filling station and vacant land

South: No significant changes depicted

East: Depicted as developed with several stores

West: No significant changes depicted

Copies of reviewed Sanborn Maps are included in Appendix B of this report.

3.3 City Directories

Partner reviewed historical city directories obtained from EDR on April 26, 2019 for past names and businesses that were listed for the subject property and adjacent properties. The findings are presented in the following table:

City Directory Search for 803 Main Street (Subject Property)

Years	Occupant Listed
1972	La Petit Beauty Salon (803 Main Street)
1975	David's Place for Hair Styles (803 Main Street)
1982	JOB (803 Main Street)
1987	Residential, General Electronics Communications (803 Main Street); Occupant (803 ½ Main Street)
1992	Accurate Locksmiths Corp., General Electronics (803 Main Street)
1995	Accurate Locksmiths Corp. (803 Main Street)
2000	Residential, Atlantic Lock & Safe Inc. (803 Main Street)
2005	Residential, Atlantic Lock & Safe Inc. (803 Main Street)
2010	Residential (803 Main Street)
2014	Occupant Unknown (803 Main Street)

Based on the city directory review, no environmentally sensitive listings were identified for the subject property addresses.

City Directory Search for Adjacent Properties

Years	Occupant Listed
1972	Residential (802 Main Street); Dobin's Kosher Meat & Poultry Market and Butcher (801 Main Street); Konner's Grill (802 Main Street); Piancone J & Sons (804 Main Street); Piancone's Bakery (806 Main Street); Piancone's Pizzeria (808 Main Street); Bradley Amer Svc Sta (811 Main Street)
1975	Abisor's Kosher Prime Meat & Poultry Market, Dobin's Kosher Prime Meat & Poultry Market (801 Main Street); Piancone J & Sons (804 Main Street); Piancone Bakery (806 Main Street); Piancone's Pizzeria (808 Main Street); Bradley Amer Svc Sta (811 Main Street)
1982	Ciro's Meat Market (801 Main Street); Piancone J & Sons (804 Main Street); Bradley Amoco Service Station (811 Main Street)
1987	La Nonna Piancone's Table, Piancone J & Sons (804 Main Street); Astro Pizza (806 Main Street); Autotek Inc., Bradley Service (811 Main Street)
1992	Bradley Beach First Aid Squad (725 Main Street); Chinatown Kitchen (801 Main Street); Residential, Lanonna Piancones Café (804 Main Street); Astro Pizza Ltd Inc. (808 Main Street); Autotek Inc. (811 Main Street)

City Directory Search for Adjacent Properties

Years	Occupant Listed
1995	Chinatown Kitchen (801 Main Street); Residential, Cozumel Inc. (808 Main Street); Autotek Inc. (811 Main Street)
2000	Cozumel Inc. (800 Main Street); Chinatown Kitchen (801 Main Street); Autotek Inc. (811 Main Street)
2005	Bradley Beach First Aid Squad (725 Main Street); Cozumel Inc. (800 Main Street); Chinatown Kitchen (801 Main Street); Residential (802, 804 Main Street); Autotek Inc. (811 Main Street); Bradley Beach Fire Dept (815 Main Street)
2010	Bradley Beach First Aid Squad (725 Main Street); Pops Café, UVA On Main LLC (800 Main Street); Chinatown Kitchen (801 Main Street); Residential (802, 804 Main Street); Autotek Inc. (811 Main Street); Borough of Bradley Beach (815 Main Street)
2014	Bradley Beach First Aid Squad (725 Main Street); Bradley Beach NJ, UVA On Main LLC (800 Main Street); Chinatown Kitchen (801 Main Street); Residential (802, 804 Main Street); Autotek Inc. (811 Main Street); Borough Of Bradley Beach, Monmouth County Of, United Engne & Trck Comp Brdly (815 Main Street)

According to the city directory review, the adjacent properties have been occupied by individual residents, restaurants, delis and markets, commercial businesses, a gasoline service station, an auto repair, and municipal offices/services. Potential issues and/or concerns regarding the adjacent properties are further discussed in Sections 4.2.3 and 6.4.

Copies of reviewed city directories are included in Appendix B of this report.

3.4 Historical Topographic Maps

Partner reviewed historical topographic maps obtained from EDR on April 25, 2019. The following was observed on the subject property and adjacent properties during the topographic map review:

Date: 1888, 1893, 1901, 1902

Subject Property:	Depicted as undeveloped
North:	Depicted as undeveloped
South:	Depicted as undeveloped
East:	Depicted as developed with a road beyond which is undeveloped land
West:	Depicted as undeveloped

Date: 1943

Subject Property:	Depicted as developed with an apparent commercial and/or residential structure
North:	Depicted as developed with apparent commercial and/or residential structures and vacant land
South:	No significant changes depicted
East:	Depicted as developed with a densely developed city block
West:	Depicted as developed with several small structures and vacant land

Date: 1954, 1970, 1981, 1989, 1995

Subject Property: Depicted as shaded, indicating dense urban development
North: Depicted as shaded, indicating dense urban development
South: Depicted as shaded, indicating dense urban development
East: Depicted as shaded, indicating dense urban development
West: Depicted as shaded, indicating dense urban development

Copies of reviewed topographic maps are included in Appendix B of this report.

4.0 REGULATORY RECORDS REVIEW

4.1 Regulatory Agencies

4.1.1 State Department

Regulatory Agency Data

Name of Agency: New Jersey Department of Environmental Protection (NJDEP)
Agency Address: 401 East State Street, Trenton, New Jersey 08625
Agency Phone Number: (609) 341-3121
Date of Contact: April 25, 2019
Method of Communication: Online
Summary of Communication: According to a NJDEP file review, records available were in regard to a property located at 803 Main Street in Belmar, New Jersey, which is located approximately 2 miles south of the subject property.

No records regarding hazardous substance use or storage, or the presence of USTs and activity use limitations (AULs) on the subject property were reportedly on file with the NJDEP. However, the subject property was identified as a Spills site, as further discussed in Section 4.2.2.

4.1.2 Health Department

Regulatory Agency Data

Name of Agency: Monmouth County Board of Health (MCBOH)
Point of Contact: Lee Beaton, Records Custodian
Agency Address: 50 East Main Street, Freehold, New Jersey 07728
Agency Phone Number: (732) 431-7456
Date of Contact: April 25, 2019
Method of Communication: Email
Summary of Communication: No records regarding hazardous substance use, storage or releases, or the presence of USTs and AULs on the subject property were on file with the MCBOH.

4.1.3 Fire Department

Regulatory Agency Data

Name of Agency: Bradley Beach Fire Department (BBFD)
Agency Address: 815 Main Street, Bradley Beach, New Jersey 07720
Agency Phone Number: (732) 776-2402
Date of Contact: May 9, 2019
Method of Communication: In Person
Summary of Communication: No records regarding hazardous substance use, storage or releases, or the presence of USTs and AULs on the subject property were on file with the BBFD.

4.1.4 Building Department

Regulatory Agency Data

Name of Agency: Bradley Beach Community Development (BBCD)
Agency Address: 701 Main Street, Bradley Beach, New Jersey 07720
Agency Phone Number: (732) 776-2999
Date of Contact: April 25, 2019
Method of Communication: Email
Summary of Communication: No records regarding tank removals at the subject property were on file with the BBCD.

4.1.5 Planning Department

Regulatory Agency Data

Name of Agency: Bradley Beach Community Development (BBCD) – Zoning Office
Agency Address: 701 Main Street, Bradley Beach, New Jersey 07720
Agency Phone Number: (732) 776-2999
Date of Contact: May 10, 2019
Method of Communication: Online
Summary of Communication: According to records reviewed, the subject property is zoned for general business development by the Borough of Bradley Beach.

4.1.6 Oil & Gas Exploration

Regulatory Agency Data

Name of Agency: National Pipeline Mapping System (NPMS)
Agency Address: 3601 Eisenhower Avenue, Alexandria, Virginia 22304
Agency Phone Number: (703) 357-6010
Date of Contact: May 10, 2019
Method of Communication: Online
Summary of Communication: According to the NPMS, no gas or hazardous liquid pipelines are located on or adjacent to the subject property.

4.1.7 Assessor's Office

Regulatory Agency Data

Name of Agency: Monmouth County Board of Taxation
Agency Address: 1 East Main Street, Freehold, New Jersey 07728
Agency Phone Number: (732) 431-7404
Date of Contact: May 10, 2019
Method of Communication: Online
Summary of Communication: According to records reviewed, the subject property is identified as Block 32, Lot 18, and is currently owned by Mr. Mark Daugherty. The current building totals approximately 1,770 square feet on a 0.12-acre lot.

Copies of pertinent documents are included in Appendix B of this report.

4.2 Mapped Database Records Search

Information from standard federal, state, county, and city environmental record sources was provided by EDR. Data from governmental agency lists are updated and integrated into one database, which is updated as these data are released. The information contained in this report was compiled from publicly available sources and the locations of the sites are plotted utilizing a geographic information system, which geocodes the site addresses. The accuracy of the geocoded locations is approximately +/-300 feet.

Using the ASTM definition of migration, Partner considers the migration of hazardous substances or petroleum products in any form onto the subject property during the evaluation of each site listed on the radius report, which includes solid, liquid, and vapor.

4.2.1 Regulatory Database Summary

Radius Report Data				
Database	Search Radius (mile)	Subject Property	Adjacent Properties	Sites of Concern
Federal NPL or Delisted NPL Site	1.00	N	N	N
Federal CERCLIS Site	0.50	N	N	N
Federal CERCLIS-NFRAP Site	0.50	N	N	N
Federal RCRA CORRACTS Facility	1.00	N	N	N
Federal RCRA TSD Facility	0.50	N	N	N
Federal RCRA Generators Site (LQG, SQG, CESQG, NonGen/NLR)	0.25	N	N	Y
Federal IC/EC Registries	0.50	N	N	N
Federal ERNS Site	Subject Property	N	N/A	N/A
State/Tribal Equivalent NPL	1.00	N	N	N
State/Tribal Equivalent CERCLIS	1.00	N	N	Y
State/Tribal Landfill/Solid Waste Disposal Site	0.50	N	N	N
State/Tribal Leaking Storage Tank Site	0.50	N	Y	Y
State/Tribal Registered Storage Tank Sites (UST/AST)	0.25	N	Y	Y
State/Tribal Voluntary Cleanup Sites (VCP)	0.50	N	N	N
State/Tribal Spills	0.50	Y	N	N
Federal Brownfield Sites	0.50	N	N	N
State Brownfield Sites	0.50	N	N	Y
EDR MGP	Varies	N	N	N
EDR US Hist Auto Station	Varies	N	Y	N
EDR US Hist Cleaners	Varies	N	N	N
Miscellaneous Databases	Varies	N	Y	Y

4.2.2 Subject Property Listings

The subject property is identified as a NJ Spills site in the regulatory database report, as discussed below:

- Atlantic Lock and Safe Co., a tenant of the subject property at 803 Main Street, reported a release on September 1, 2010 (Case Number 10-09-01-1239-23). According to the NJDEP Dataminer online database, a vial of material was spilled and caused the evacuation of the store and upper apartment. The local fire department responded to the release and a cleanup was reportedly completed by the local hazardous materials division. The responsible party was identified as Atlantic Lock and Safe and the current status of this incident is terminated. Based on the reported cleanup and current regulatory status (terminated), this release case is not expected to represent a significant environmental concern at this time.

4.2.3 Adjacent Property Listings

The adjacent property to the north is identified as an US Historic Auto, NJ UST, NJ HIST LUST and NJEMS site in the regulatory database report, as discussed below:

- Bradley Amoco Service Center/Autotek Inc. at 811 Main Street is located adjacent to the north of the subject property and situated hydrologically cross-gradient. This facility operated as a gasoline service station between 1969 and 2009, and an automotive repair shop between 1991 and 2014. This facility was reportedly equipped with the following USTs:
 - Three gasoline USTs installed in January 1977 and removed on November 29, 1988
 - One 450-gallon waste oil UST installed in January 1944 and removed on May 28, 1998
 - One 450-gallon waste oil UST installed in January 1944 and is currently listed as “other”

This facility reported a single contamination impacting soils only in September 1998 under Program Interest (PI) Number 032257. This case was assigned to a UST remediation program and was issued an Unrestricted Use No Further Action (NFA) status on September 9, 1999. Based on the regulatory oversight, closure of the release case, and inferred direction of groundwater flow, this listing is not expected to represent a significant environmental concern and it is unlikely that a regulatory file review for this site would alter the findings of this assessment.

The adjacent property to the west is identified as NJ UST site in the regulatory database report, as discussed below:

- Bradley Beach Fire House at 725 Main Street Rear is located adjacent to the west of the subject property and situated hydrologically up-gradient. This facility was reportedly equipped with the following USTs:
 - One 550-gallon unleaded gasoline UST installed in January 1944 and removed on March 26, 2003
 - One 1,000-gallon No. 6 heating oil UST installed in January 1944 and removed on March 26, 2003

According to the NJDEP Dataminer online database, this facility submitted a site investigation report regarding the USTs in May 2016 (PI Number 192570). An Unrestricted Use NFA status was issued on August 23, 2016. Based on the removal of the USTs and regulatory closure, this listing is not expected to represent a significant environmental concern and it is unlikely that a regulatory file review for this site would alter the findings of this assessment.

Based on the findings, vapor migration is not expected to represent a significant environmental concern at this time.

4.2.4 Sites of Concern Listings

The property to the west-southwest is identified as a NJ State Hazardous Waste Site (SHWS), LUST, HIST LUST, UST, NJ Brownfields, Facility Index System (FINDS), and Resource Conservation and Recovery Act (RCRA) Non-Generator/No Longer Regulated (NonGen/NLR) site in the regulatory database report, as discussed below:

- Waste Management of New Jersey at 505 Memorial Drive is located approximately 295 feet west-southwest of the subject property and situated hydrologically up- to cross-gradient. This facility was identified as a RCRA NonGen/NLR site that does not presently generate hazardous waste. It has operated as a non-generator since 2006, prior to which it operated as an unverified generator. This facility was reportedly equipped with the following USTs:
 - One diesel UST installed in January 1967 and removed on August 1, 1988
 - One 10,000-gallon diesel UST installed in January 1986 and removed on November 30, 2004
 - One 2,000-gallon unleaded gasoline UST installed in January 1977 and removed on March 26, 1999
 - One 275-gallon waste oil UST installed in January 1944 and removed on September 15, 2008

This facility reported a release from a known source or release with groundwater contamination in July 2006 (PI Number 009942). This case was assigned to a Licensed Site Remediation Professional (LSRP) for oversight, with remedial activities scheduled until 2022. Based on the regulatory oversight and on-going remedial activities, this listing is not expected to represent a significant environmental concern and it is unlikely that a regulatory file review for this site would alter the findings of this assessment.

Based on the findings, vapor migration is not expected to represent a significant environmental concern at this time.

4.2.5 Orphan Listings

No orphan listings of concern are identified in the regulatory database report.

A copy of the regulatory database report is included in Appendix C of this report.

5.0 USER PROVIDED INFORMATION AND INTERVIEWS

In order to qualify for one of the *Landowner Liability Protections (LLPs)* offered by the Small Business Liability Relief and Brownfields Revitalization Act of 2001 (the *Brownfields Amendments*), the *User* must conduct the following inquiries required by 40 CFR 312.25, 312.28, 312.29, 312.30, and 312.31. The *User* should provide the following information to the *environmental professional*. Failure to provide this information could result in a determination that *all appropriate inquiries* is not complete. The *User* is asked to provide information or knowledge of the following:

- Review Title and Judicial Records for Environmental Liens and AULs
- Specialized Knowledge or Experience of the User
- Actual Knowledge of the User
- Reason for Significantly Lower Purchase Price
- Commonly Known or *Reasonably Ascertainable* information
- Degree of Obviousness
- Reason for Preparation of this Phase I ESA

Fulfillment of these user responsibilities is key to qualification for the identified defenses to CERCLA liability. Partner requested our Client to provide information to satisfy User Responsibilities as identified in Section 6 of the ASTM guidance.

Pursuant to ASTM E1527-13, Partner requested the following site information from Coastal Custom Builders LLC (User of this report).

User Responsibilities

Item	Provided By User	Not Provided By User	Discussed Below	Does Not Apply
Environmental Pre-Survey Questionnaire		X		
Title Records, Environmental Liens, and AULs			X	
Specialized Knowledge			X	
Actual Knowledge			X	
Valuation Reduction for Environmental Issues			X	
Identification of Key Site Manager	Section 5.1.3			
Reason for Performing Phase I ESA	Section 1.1			
Prior Environmental Reports		X		
Other		X		

5.1 Interviews

5.1.1 Interview with Owner

The owner of the subject property, identified as Mr. Mark Daugherty, was not available to be interviewed at the time of the assessment.

5.1.2 Interview with Report User

Mr. John Naples, report user, indicated that he had no information pertaining to any pending, threatened, or past litigation relevant to hazardous substances or petroleum products in, on, or from the subject property; any pending, threatened, or past administrative proceedings relevant to hazardous substances or petroleum products in, on, or from the subject property; or any notices from a governmental entity regarding any possible violation of environmental laws or possible liability relating to hazardous substances or petroleum products.

According to Mr. Naples, the subject property was historically occupied by a residence, a locksmith and a hair salon prior to its vacancy approximately two years ago.

5.1.3 Interview with Key Site Manager

For information regarding the interview with the key site manager, please see Section 5.1.2 above.

5.1.4 Interviews with Past Owners, Operators and Occupants

Interviews with past owners, operators and occupants were not reasonably ascertainable and thus constitute a data gap.

5.1.5 Interview with Others

As the subject property is not an abandoned property as defined in ASTM 1527-13, interview with others were not performed.

5.2 User Provided Information

5.2.1 Title Records, Environmental Liens, and AULs

Partner was not provided with title records or environmental lien and AUL information for review as part of this assessment.

5.2.2 Specialized Knowledge

No specialized knowledge of environmental conditions associated with the subject property was provided by the User at the time of the assessment.

5.2.3 Actual Knowledge of the User

No actual knowledge of any environmental lien or AULs encumbering the subject property or in connection with the subject property was provided by the User at the time of the assessment.

5.2.4 Valuation Reduction for Environmental Issues

No knowledge of valuation reductions associated with the subject property was provided by the User at the time of the assessment.

5.2.5 Commonly Known or Reasonably Ascertainable Information

The User did not provide information that is commonly known or *reasonably ascertainable* within the local community about the subject property at the time of the assessment.

5.2.6 Previous Reports and Other Provided Documentation

No previous reports or other pertinent documentation was provided to Partner for review during the course of this assessment.

6.0 SITE RECONNAISSANCE

The weather at the time of the site visit was overcast. Refer to Section 1.5 for limitations encountered during the field reconnaissance and Sections 2.1 and 2.2 for subject property operations. The table below provides the site assessment details:

Site Assessment Data

Site Assessment Performed By: Taylor Rodenberg
Site Assessment Conducted On: May 9, 2019

The table below provides the subject property personnel interviewed during the field reconnaissance:

Site Visit Personnel for 803 Main Street (Subject Property)

Name	Title/Role	Contact Number	Site Walk*
Mr. John Naples	Report User/Key Site Manager	(732) 284-7555	Yes

* Accompanied Partner during the field reconnaissance activities and provided information pertaining to the current operations and maintenance of the subject property

Potential environmental concerns were identified during the onsite reconnaissance, as further discussed below.

6.1 General Site Characteristics

6.1.1 Solid Waste Disposal

Due to the vacant nature of the subject property, solid waste is not currently generated onsite. No evidence of illegal dumping of solid waste was observed during the Partner site reconnaissance.

6.1.2 Sewage Discharge and Disposal

Sanitary discharges on the subject property were directed into the municipal sanitary sewer system. The Borough of Bradley Beach reportedly services the subject property vicinity. No wastewater treatment facilities or septic systems were observed or reported on the subject property.

6.1.3 Surface Water Drainage

Storm water is removed from the subject property primarily by sheet flow action across the paved surfaces and rooftop toward storm water drains located throughout the subject property and in the public right of way. The subject property is connected to a municipal owned and maintained sewer system.

The subject property does not appear to be a designated wetland area, based on information obtained from the United States Fish & Wildlife Service; however, a comprehensive wetlands survey would be required in order to formally determine actual wetlands on the subject property. No surface impoundments, wetlands, natural catch basins, settling ponds, or lagoons are located on the subject property. No drywells were identified on the subject property.

6.1.4 Source of Heating and Cooling

Heating systems, as well as domestic hot water equipment, are fueled by natural gas provided by Jersey Central Power and Light (JCP&L). The mechanical system is comprised of an apparent gas-fired boiler. Hot water is provided by a natural gas hot water heater.

6.1.5 Wells and Cisterns

No aboveground evidence of wells or cisterns was observed during the site reconnaissance.

6.1.6 Wastewater

Domestic wastewater generated at the subject property was disposed by means of the sanitary sewer system. No industrial process is currently performed at the subject property.

6.1.7 Septic Systems

No septic systems were observed or reported on the subject property.

6.1.8 Additional Site Observations

During the onsite reconnaissance, several pipes were observed along the rear (western) portion of the subject building. The pipes were threated through a recently poured concrete landing. No additional information regarding the pipes was provided during the course of this assessment. Since the subject property was heated by natural gas, Partner opines that these conduits are likely to be used for electric, communication and/or plumbing systems being installed or updated. In addition, no records regarding USTs or removals were identified during a review of the agency documentation and regulatory database report. Based on the above, the pipes are not expected to represent a significant environmental concern at this time. However, should any UST(s) be encountered during redevelopment activities, the tank(s) should be properly removed in accordance with state and local regulations.

No additional general site characteristics were observed during the site reconnaissance.

6.2 Potential Environmental Hazards

6.2.1 Hazardous Substances and Petroleum Products Used or Stored at the Site

No hazardous substances or petroleum products were observed on the subject property during the site reconnaissance.

6.2.2 Aboveground & Underground Hazardous Substance or Petroleum Product Storage Tanks (ASTs/USTs)

During the onsite reconnaissance, Partner observed a 275-gallon heating oil AST on the southern portion of the subject property. The AST was installed on an unknown date and was not equipped with any forms of secondary containment. The AST was observed to be in average to fair condition with no signs of leak, stains or spills in the vicinity. Based on the conditions observed, the AST is not expected to represent a significant environmental concern at this time.

6.2.3 Evidence of Releases

No significant spills, stains or other indications that a surficial release has occurred at the subject property were observed. However, *de minimis* staining was observed in the basement of the subject property. The staining was located on concrete with no drains or conduits in the vicinity. In addition, no odors or sheens were noted. Based on the conditions observed, the staining is not expected to represent a significant environmental concern at this time.

6.2.4 Polychlorinated Biphenyls (PCBs)

No potential PCB-containing equipment (transformers, oil-filled switches, hoists, lifts, dock levelers, hydraulic elevators, etc.) was observed on the subject property during Partner's reconnaissance.

6.2.5 Strong, Pungent or Noxious Odors

No strong, pungent or noxious odors were evident during the site reconnaissance.

6.2.6 Pools of Liquid

No pools of liquid were observed on the subject property during the site reconnaissance.

6.2.7 Drains, Sumps and Clarifiers

No drains, sumps, or clarifiers, other than those associated with storm water removal, were observed on the subject property during the site reconnaissance.

6.2.8 Pits, Ponds and Lagoons

No pits, ponds or lagoons were observed on the subject property.

6.2.9 Stressed Vegetation

No stressed vegetation was observed on the subject property.

6.2.10 Additional Potential Environmental Hazards

No additional environmental hazards, including landfill activities or radiological hazards, were observed.

6.3 Non-ASTM Services

6.3.1 Asbestos-Containing Materials (ACMs)

Asbestos is the name given to a number of naturally occurring, fibrous silicate minerals mined for their useful properties such as thermal insulation, chemical and thermal stability, and high tensile strength. The Occupational Safety and Health Administration (OSHA) regulation 29 CFR 1926.1101 requires certain construction materials to be *presumed* to contain asbestos, for purposes of this regulation. All thermal system insulation (TSI), surfacing material, and asphalt/vinyl flooring that are present in a building constructed prior to 1981 and have not been appropriately tested are "presumed asbestos-containing material" (PACM).

The subject property building was constructed *circa* 1930 with an addition constructed *circa* 1953, and may have asbestos containing materials (ACMs: materials containing >1% asbestiform components determined by the EPA 600/R-93/116 Method using Polarized Light Microscopy) present. The table below outlines suspect ACM that is generally found in buildings of this age:

Suspect ACM

Drywall Systems
Roofing Materials

Based on this building's date of construction, prior to disturbance, Partner recommends a comprehensive asbestos survey of the property to determine the presence, condition, friability and likely future condition of suspect or confirmed ACM. All suspect materials must be handled as ACM according to local, state and federal regulations until the results of sampling and analysis indicate the material is a non-ACM. According to the US EPA, ACM that is intact and in good condition can, in general, be managed safely in-place under an Operations and Maintenance (O&M) Program until removal is dictated by renovation, demolition, or deteriorating material condition.

6.3.2 Lead-Based Paint (LBP)

Lead is a highly toxic metal that affects virtually every system of the body. LBP is defined as any paint, varnish, stain, or other applied coating that has 1 mg/cm² (or 5,000 ug/g or 0.5% by weight) or more of lead. Congress passed the Residential Lead-Based Paint Hazard Reduction Act of 1992, also known as "Title X", to protect families from exposure to lead from paint, dust, and soil. Under Section 1017 of Title X, intact LBP on most walls and ceilings is not considered a "hazard," although the condition of the paint should be monitored and maintained to ensure that it does not become deteriorated. Further, Section 1018 of this law directed the Housing and Urban Development (HUD) and the US EPA to require the disclosure of known information on LBP and LBP hazards before the sale or lease of most housing built before 1978.

Based on the age of the subject property building (pre-1978), there is a potential that LBP is present. Overall, interior and exterior painted surfaces were observed to be in good condition and therefore are not expected to represent a "hazard," although the condition of the paint should be monitored and maintained to ensure that it does not become deteriorated.

Actual material samples would need to be collected in order to determine if LBP is present.

6.3.3 Radon

Radon is a colorless, odorless, naturally occurring, radioactive, inert, gaseous element formed by radioactive decay of radium (Ra) atoms. The US EPA has prepared a map to assist National, State, and local organizations to target their resources and to implement radon-resistant building codes. The map divides the country into three Radon Zones, according to the table below:

EPA Radon Zones

EPA Zones	Average Predicted Radon Levels	Potential
Zone 1	Exceed 4.0 pCi/L	Highest
Zone 2	Between 2.0 and 4.0 pCi/L	Moderate
Zone 3	Less than 2.0 pCi/L	Low

It is important to note that the EPA has found homes with elevated levels of radon in all three zones, and the US EPA recommends site-specific testing in order to determine radon levels at a specific location. However, the map does give a valuable indication of the propensity of radon gas accumulation in structures.

Radon sampling was not conducted as part of this assessment. Review of the US EPA Map of Radon Zones places the subject property in Zone 1. Based upon the vacant nature of the subject, radon is not considered to be a significant environmental concern at this time.

6.3.4 Lead in Drinking Water

According to available information, a public water system operated by NJAW serves the subject property vicinity. Reportedly, shallow groundwater beneath the subject property is not utilized for domestic purposes. The sources of public water for the Borough of Bradley Beach are groundwater from the Potomac-Raritan-Magothy Aquifer and surface water from the Glendola, Manasquan and Swimming Rivers Reservoirs and the Manasquan, Shark and Swimming Rivers. According to the 2017 Annual Water Quality Report, water supplied to the subject property is in compliance with all State and Federal regulations pertaining to drinking water standards, including lead and copper. Water sampling was not conducted to verify water quality.

6.3.5 Mold

Molds are microscopic organisms found virtually everywhere, indoors and outdoors. Mold will grow and multiply under the right conditions, needing only sufficient moisture (e.g. in the form of very high humidity, condensation, or water from a leaking pipe, etc.) and organic material (e.g., ceiling tile, drywall, paper, or natural fiber carpet padding).

Partner observed accessible, interior areas for the subject property building for significant evidence of mold growth with the exceptions detailed in Section 1.5 of this report; however, this ESA should not be used as a mold survey or inspection. Additionally, this limited assessment was not designed to assess all areas of potential mold growth that may be affected by mold growth on the subject property. Rather, it is intended to give the client an indication as to whether or not conspicuous (based on observed areas) mold growth is present at the subject property. This evaluation did not include a review of pipe chases, mechanical systems, or areas behind enclosed walls and ceilings.

No obvious indications of water damage or mold growth were observed during Partner's visual assessment.

6.4 Adjacent Property Reconnaissance

The adjacent property reconnaissance consisted of observing the adjacent properties from the subject property premises.

6.4.1 Hazardous Substances and Petroleum Products Used or Stored at the Site

During the off-site reconnaissance, the north adjacent property at 811 Main Street was observed to be developed with a vacant Autotek auto repairs. This facility was identified in the regulatory database report as further discussed in Section 4.2.3.

In addition, Partner observed two 55-gallons drums on the south adjacent property at 801 Main Street. The drums were not labeled but appeared to contain used cooking oil/grease. The drums were observed to be in good overall condition with no signs of significant leaks, stains or spills. Based on the conditions observed, the adjacent drums are not expected to represent a significant environmental concern at this time.

6.4.2 PCBs

Several pole-mounted transformers were observed on the adjacent properties. No staining or leakage was observed in the vicinity of the transformers. Based on these observations, the presence of adjacent transformers is not expected to represent a significant environmental concern at this time.

7.0 FINDINGS AND CONCLUSIONS

Findings

A *recognized environmental condition (REC)* refers to the presence or likely presence of any hazardous substances or petroleum products in, on, or at a property: due to release to the environment; under conditions indicative of a release to the environment; or under conditions that pose a material threat of a future release to the environment.

- Partner did not identify any RECs during the course of this assessment.

A *controlled recognized environmental condition (CREC)* refers to a REC resulting from a past release of hazardous substances or petroleum products that has been addressed to the satisfaction of the applicable regulatory authority, with hazardous substances or petroleum products allowed to remain in place subject to the implementation of required controls.

- Partner did not identify any CRECs during the course of this assessment.

A *historical recognized environmental condition (HREC)* refers to a past release of any hazardous substances or petroleum products that has occurred in connection with the property and has been addressed to the satisfaction of the applicable regulatory authority or meeting unrestricted use criteria established by a regulatory authority, without subjecting the property to any required controls.

- Partner did not identify any HRECs during the course of this assessment.

An *environmental issue* refers to environmental concerns identified by Partner, which do not qualify as RECs; however, warrant further discussion.

- Partner observed a 275-gallon heating oil aboveground storage tank (AST) on the southern portion of the subject property. The AST was installed on an unknown date and was not equipped with any forms of secondary containment. The AST was observed to be in average to fair condition with no signs of leak, stains or spills in the vicinity. Based on the conditions observed, the AST is not expected to represent a significant environmental concern at this time.
- During the onsite reconnaissance, several pipes were observed along the rear (western) portion of the subject building. The pipes were threaded through a recently poured concrete landing. No additional information regarding the pipes was provided during the course of this assessment. Since the subject property was heated by natural gas, Partner opines that these conduits are likely to be used for electric, communication and/or plumbing systems being installed or updated. In addition, no records regarding underground storage tanks (USTs) were identified during a review of the agency documentation and regulatory database report. Based on the above, the pipes are not expected to represent a significant environmental concern at this time. However, should any UST(s) be encountered during redevelopment activities, the tank(s) should be properly removed in accordance with state and local regulations.

- Due to the age of the subject property building, there is a potential that asbestos-containing material (ACM) and/or lead-based paint (LBP) are present. Overall, suspect ACMs and painted surfaces were observed to be in good condition and do not pose a health and safety concern at this time. Should these materials be replaced, the identified suspect ACMs and painted surfaces would need to be sampled to confirm the presence or absence of asbestos and lead prior to any renovation or demolition activities to prevent potential exposure to workers and/or building occupants.
- Radon is a colorless, odorless, naturally occurring, radioactive, inert, gaseous element formed by radioactive decay of radium atoms. Review of the EPA Map of Radon Zones places the subject property in Zone 1, where average predicted radon levels exceed the EPA's action level of 4.0 picoCuries per Liter (pCi/L). The subject building is currently vacant; as such, radon sampling was not conducted as part of this assessment.

Conclusions, Opinions and Recommendations

Partner has performed a Phase I Environmental Site Assessment in conformance with the scope and limitations of ASTM Practice E1527-13 of 803 Main Street in Bradley Beach, Monmouth County, New Jersey (the "subject property"). Any exceptions to, or deletions from, this practice are described in Section 1.5 of this report.

This assessment has revealed no evidence of RECs in connection with the subject property; however, environmental issues were identified. Based on the conclusions of this assessment, Partner recommends the following:

- If no longer in use, the AST should be properly removed and disposed of in accordance with state and local regulations.
- Operations and Maintenance (O&M) Programs should be implemented in order to safely manage the suspect ACMs and LBP located at the subject property.
- If the subject property is redeveloped for residential use in the future, radon sampling should be conducted in order to confirm if elevated radon levels are present.

8.0 SIGNATURES OF ENVIRONMENTAL PROFESSIONALS

Partner has performed a Phase I Environmental Site Assessment of the property located at 803 Main Street in Bradley Beach, Monmouth County, New Jersey in conformance with the scope and limitations of the protocol and the limitations stated earlier in this report. Exceptions to or deletions from this protocol are discussed earlier in this report.

By signing below, Partner declares that, to the best of our professional knowledge and belief, we meet the definition of *Environmental Professional* as defined in §312.10 of 40 CFR §312. Partner has the specific qualifications based on education, training, and experience to assess a *property* of the nature, history, and setting of the subject *property*. Partner has developed and performed the all appropriate inquiries in conformance with the standards and practices set forth in 40 CFR Part 312.

EXECUTIVE SUMMARY

DESCRIPTION

Environmental Data Resources, Inc.'s (EDR) City Directory Report is a screening tool designed to assist environmental professionals in evaluating potential liability on a target property resulting from past activities. EDR's City Directory Report includes a search of available city directory data at 5 year intervals.

RECORD SOURCES

EDR's Digital Archive combines historical directory listings from sources such as Cole Information and Dun & Bradstreet. These standard sources of property information complement and enhance each other to provide a more comprehensive report.

EDR is licensed to reproduce certain City Directory works by the copyright holders of those works. The purchaser of this EDR City Directory Report may include it in report(s) delivered to a customer. Reproduction of City Directories without permission of the publisher or licensed vendor may be a violation of copyright.

If the an individual was specified above, the individual was DEP Licensed, please specify the license type the individual holds:	License Type:

The New Jersey Department of Environmental Protection has responded to your submitted Open Public Records Act (OPRA) record request. The following information will help you understand the response and your next available actions.

Tracking #: This is the Department's assigned Tracking # to your OPRA record request, which should be used in all corresponding matters.

Record Request Response:

- **In Progress** – Based on the nature of the request, the records sought, and/or the manner to which the records may exist, the Department requires additional time to investigate and respond to the request.
- **Filled** – Based on the information provided in your request, the Department was able to investigate and respond to your record request.
- **Denied** – Based on the nature of the request and/or the records sought, the Department has denied your request pursuant to a specific exemption(s) cited in N.J.S.A. 47:1A-1 seq.
- **Partial** – The Department has identified both responsive government records and records being denied based on the nature of the request and/or the records sought, that do not meet the definition of a government record pursuant to a specific exemption(s) cited in N.J.S.A. 47:1A-1 seq.

Disposition Notes: Provides detailed information concerning the Department's response to your request.

Accessing Records: Dependent on the volume of records and your interest, there are five (5) methods available to access the responsive government records:

- **File Review** – Schedule a file review with the Department to directly access the records and take notes or tag records of interest for copying. Copying can be performed by either the Department's onsite Copying Unit at State duplication fee costs or by the requester employing a Copy Vendor Service. If there are records stored in archives, a five-day processing period will be included prior to scheduling a review.
- **Copy Request** – All records of interest will be copied by the Department's onsite Copying Unit at State duplication fee costs unless a Copy Vendor Service is employed.
- **Electronic Records Request** – Dependent on the size & nature of the e-records, the Department will email the records or provide a CD or DVD.
- **Fax Request** – Based on the number of pages, the Department faxes the responsive records.
- **Web Access** – The responsive records can be accessed directly through the Department's web site. Web address will be provided.

Access to Government Records Under the New Jersey Open Public Records Act (N.J.S.A. 47:1A-1 et seq.)

1. The fees for duplication of a government record are specified below. We will notify you of any special charges, special service charges or other additional charges authorized by State law or regulation before processing your request. Payment shall be made by check or money order payable to the State of New Jersey and mailed to the address specified below.

Hard Copies:
Letter & Legal size = \$0.05 per page
Oversized Maps (Color) = \$5.00 per map
Oversized Maps (B&W) = \$3.00 per map

Electronic Records: CDs = \$0.55 per CD
DVDs = \$0.55 per DVD

2. Pursuant to OPRA (C.47:1A-5c & C47:1A-5d), the Department will apply special service charge for any extraordinary expenditure of time and effort to accommodate a request. The special service charge will be based on the actual direct cost of providing the records. The requester shall have the opportunity to review and object to the charge prior to it being incurred; however, in the event the requester objects to the special service charge, the request will be closed and access to the records will not be granted.
3. By law, the Department must notify you that it grants or denies a request for access to government records within seven business days after the custodian of the record requested receives the request, provided that the record is currently available and not in storage. If the record requested is not currently available or is in storage, the custodian will advise you within seven business days when the record can be made available and the estimated cost. You may agree with the custodian to extend the time for making records available, or granting or denying your request.
4. You may be denied access to a government record if your request would substantially disrupt agency operations and the custodian is unable to reach a reasonable solution with you.
5. If the Department was unable to comply with your request for access to a government record, the custodian will indicate the reasons for denial on the request form.
6. Except as otherwise provided by law or by agreement with the requester, if the custodian of the record requested fails to respond to you within seven business days of receiving a request form, the failure to respond will be considered a denial of your request.
7. **Resolution of Disputed Findings:**

In the event that a requester does not agree with the Department's record response, the requester should:

No Records - Reexamined the request details to evaluate if all of the information was provided that could aid the Department in locating records. The Department's ability to identify records of interest is in direct correlation to matching the Department information with the information provided on the request. Such important identifiers are Facility/Site Name, Address, Case #, Permit #, Block/Lot.

Denial - If your request for access to a government record has been denied or unfilled within the time permitted by law, you have a right to challenge the decision by the Department to deny access. The Department denies access to records only when those records do not meet the definition of a government record and/or public access is not allowed pursuant to the law. At your option, you may either:

- a. Contact the Office of Record Access to re-visit the matter or provide further explanation.
- b. Institute a proceeding in the Superior Court of New Jersey
- c. File a complaint in writing with the Government Records Council (GRC). You may contact the GRC by toll-free telephone at 866-850-0511, by mail at PO Box 819, Trenton, NJ, 08625, by e-mail at grc@dca.state.nj.us, or at their web site at www.state.nj.us/grc. The Council can also respond to other questions about the law.

8. Information provided on this form may be subject to disclosure under the Open Public Records Act.

Revised Addendum Disposition Notes: NONE

This Report Pertains to Communications Center # 10-09-01-1239-23

May 09, 2019 8:22 AM

NOTE: Incident reports display information about incidents (complaints) that were received by the Department. The different reports within this category allow the user to search for Incidents by Incident ID Number, Communication Center Number, County, Municipality and Date Range. Reports and complaints are made to the DEP through a variety of sources, including regulated facilities and members of the public. Please note that these reports are subject to verification and/or investigation by the DEP or other appropriate agencies. The information contained in this report will be limited to the date of use by each enforcement program. The programs began using the system for this information as follows: Air - 10/1998; Hazardous Waste - 1/2000; Water - 7/2000; Right To Know - 11/2000; Solid Waste - 7/2001; TCPA - 12/2001; Land Use 12/2001; DPCC - 1/2002; Communication Center/Site Remediation Program - 3/2002 and Pesticides - 4/2002. For complete information prior to these dates, please submit an official OPRA request form to the Department.

Re: OPRA REQUEST RECEIVED 04/25/2019

Dear Taylor,

The Monmouth County Health Department received your Open Public Records Act (OPRA) request on **04/25/19**. As such, the seven (7) business day deadline to respond to your request is **05/06/19**. This response to your request is being provided to you on the 2nd business day after the custodian's receipt of said request.

Please be advised that the Monmouth County Health Department has conducted a thorough search based on the information provided and found no documents responsive to your request.

If your request for access to a government record has been denied or unfilled within the seven (7) business days required by law, you have a right to challenge the decision by the Monmouth County Health Department to deny access. At your option, you may either institute a proceeding in the Superior Court of New Jersey or file a complaint with the Government Records Council ("GRC") by completing the Denial of Access Complaint Form. You may contact the GRC by toll-free telephone at 866-850-0511, by mail at P.O. Box 819, Trenton, NJ, 08625, by e-mail at grc@dca.state.nj.us, or at their web site at www.state.nj.us/grc. The Council can also answer other questions about the law. All questions regarding complaints filed in Superior Court should be directed to the Court Clerk in your County.

Respectfully,

Lee Beaton
Monmouth County Health Dept.

EXECUTIVE SUMMARY

A search of available environmental records was conducted by Environmental Data Resources, Inc (EDR). The report was designed to assist parties seeking to meet the search requirements of EPA's Standards and Practices for All Appropriate Inquiries (40 CFR Part 312), the ASTM Standard Practice for Environmental Site Assessments (E 1527-13), the ASTM Standard Practice for Environmental Site Assessments for Forestland or Rural Property (E 2247-16), the ASTM Standard Practice for Limited Environmental Due Diligence: Transaction Screen Process (E 1528-14) or custom requirements developed for the evaluation of environmental risk associated with a parcel of real estate.

SURROUNDING SITES: SEARCH RESULTS

Surrounding sites were identified in the following databases.

Elevations have been determined from the USGS Digital Elevation Model and should be evaluated on a relative (not an absolute) basis. Relative elevation information between sites of close proximity should be field verified. Sites with an elevation equal to or higher than the target property have been differentiated below from sites with an elevation lower than the target property.

Page numbers and map identification numbers refer to the EDR Radius Map report where detailed data on individual sites can be reviewed.

Sites listed in ***bold italics*** are in multiple databases.

Unmappable (orphan) sites are not considered in the foregoing analysis.

STANDARD ENVIRONMENTAL RECORDS

Federal RCRA generators list

RCRA-CESQG: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Conditionally exempt small quantity generators (CESQGs) generate less than 100 kg of hazardous waste, or less than 1 kg of acutely hazardous waste per month.

A review of the RCRA-CESQG list, as provided by EDR, and dated 03/25/2019 has revealed that there are 3 RCRA-CESQG sites within approximately 0.25 miles of the target property.

NJ HWS RE-EVAL: The locations were removed from the Known Contaminated Sites list for a variety of reasons. Some of the sites were taken off the list because they were inactive, some were not assigned a case worker and some were no longer contaminated. Inspectors from the DEP are now undertaking a full re-evaluation of each of the locations statewide. That includes visual and environmental tests to see whether contamination still exists.

A review of the NJ HWS RE-EVAL list, as provided by EDR, and dated 09/20/2007 has revealed that there are 6 NJ HWS RE-EVAL sites within approximately 1 mile of the target property.

EXECUTIVE SUMMARY

State and tribal voluntary cleanup sites

NJ VCP: Through the VCP, responsible parties, developers, local officials, or individuals may work with the department to remediate non-priority contaminated sites that pose no immediate threat to human health or the environment.

A review of the NJ VCP list, as provided by EDR, and dated 01/12/2018 has revealed that there are 51 NJ VCP sites within approximately 0.5 miles of the target property.

State and tribal Brownfields sites

NJ BROWNFIELDS: Brownfields are identified as former or current commercial or industrial use sites that are presently vacant or underutilized, on which there is suspected to have been a discharge of a contamination to the soil or groundwater at concentrations greater than applicable cleanup criteria.

A review of the NJ BROWNFIELDS list, as provided by EDR, and dated 01/30/2019 has revealed that there are 18 NJ BROWNFIELDS sites within approximately 0.5 miles of the target property.

ADDITIONAL ENVIRONMENTAL RECORDS

Other Ascertainable Records

RCRA NonGen / NLR: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Non-Generators do not presently generate hazardous waste.

A review of the RCRA NonGen / NLR list, as provided by EDR, and dated 03/25/2019 has revealed that

EXECUTIVE SUMMARY

there are 9 RCRA NonGen / NLR sites within approximately 0.25 miles of the target property.

OSCAR'S CLEANERS Facility Id: L2244	906 MAIN ST	NE 0 - 1/8 (0.057 mi.)	C9	17

NJ ISRA: The ISRA process begins with determining if the Act applies to your type of business and transaction. The provisions of ISRA only apply to industrial establishments. What is an industrial establishment? The term "industrial establishment" refers to the type of business operations and transactions that would subject a facility to review under ISRA. An industrial establishment must meet each of the following three criteria: The place of business or real property at which such business is conducted, having a North American Industry Classification System (NAICS) code listed in N.J.A.C. 7:26 B - Appendix C subject to the specified exceptions and limitations. The place of business must have been engaged in operations on or after December 31, 1983; and The place of business must involve the generation, manufacture, refining, transportation, treatment, storage, handling, or disposal of hazardous substances or hazardous wastes.

A review of the NJ ISRA list, as provided by EDR, and dated 10/10/2018 has revealed that there are 10 NJ ISRA sites within approximately 0.5 miles of the target property.

EDR HIGH RISK HISTORICAL RECORDS

EDR Exclusive Records

EDR Hist Auto: EDR has searched selected national collections of business directories and has collected listings of potential gas station/filling station/service station sites that were available to EDR researchers. EDR's review was limited to those categories of sources that might, in EDR's opinion, include gas station/filling station/service station establishments. The categories reviewed included, but were not limited to gas, gas station, gasoline station, filling station, auto, automobile repair, auto service station, service station, etc. This database falls within a category of information EDR classifies as "High Risk Historical Records", or HRHR. EDR's HRHR effort presents unique and sometimes proprietary data about past sites and operations that typically create environmental concerns, but may not show up in current government records searches.

A review of the EDR Hist Auto list, as provided by EDR, has revealed that there are 2 EDR Hist Auto sites within approximately 0.125 miles of the target property.

Contaminants: Volatile Organic CompoundsVolatile Organic CompoundsVolatile Organic Compounds
 Facility Status: RemediatingConfirmedVenting
 Funding Source: 1981 Bond Fund
 Amnt Hazardous: \$208,000
 Site Description: Sal's Auto Repair formerly operated as a gasoline serice station. The service station owner removed several leaking underground gasoline storage tanks in 1993 with oversight of NJDEP's Responsible Party Remediation Element. A peliminary investigation conducted after the tanks were removed indicated soil and ground water were significantly contaminated with volatile organic compounds. NJDEP directed the service station ower to investigate and clean up the site, but the onwer did not comply. In 2003 NJDEP's Remedial Response Element installed ground water remediation systems at the Sal's Auto Repair site and at a property across the street to treat a plume of contaminated ground water from the site. NJDEP believes another gas station in thearea may also be contributing to the ground water plume. In 2003 the Remedial Response Element also began an investigation to determine whether gasoline vapors from the ground water plume were migrating into neighboring buildings through the slabs and foundations did contaminating the indoor air. Testing of the indoor air at eight nearby properties identified one building with gasoline vapors at levels exceeding NJDEP's health-based criteria. The Remedial Response Element installed a subsurfacedepressurization system at the building and took other measures to reduce the vapors to acceptable levels. Additional indoor air testing will be conducted in 2004 to determine whether other buildings in the area are affected.

FINDS:

Registry ID: 110009833083

Environmental Interest/Information System

NJ-NJEMS (New Jersey - New Jersey Environmental Management System).
The Department of Environmental Protection (NJDEP) manages large databases of environmental information in this integrated system.

ICIS (Integrated Compliance Information System) is the Integrated Compliance Information System and provides a database that, when complete, will contain integrated Enforcement and Compliance information across most of EPA's programs. The vision for ICIS is to

Map ID
Direction
Distance
Elevation

MAP FINDINGS

Site

Database(s)

EDR ID Number
EPA ID Number

TFH PUBLICATIONS INC (Continued)

1004560975

replace EPA's independent databases that contain Enforcement data with a single repository for that information. Currently, ICIS contains all Federal Administrative and Judicial enforcement actions. This information is maintained in ICIS by EPA in the Regional offices and it Headquarters. A future release of ICIS will replace the Permit Compliance System (PCS) which supports the NPDES and will integrate that information with Federal actions already in the system. ICIS also has the capability to track other activities occurring in the Region that support Compliance and Enforcement programs. These include; Incident Tracking, Compliance Assistance, and Compliance Monitoring.

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

To maintain currency of the following federal and state databases, EDR contacts the appropriate governmental agency on a monthly or quarterly basis, as required.

Number of Days to Update: Provides confirmation that EDR is reporting records that have been updated within 90 days from the date the government agency made the information available to the public.

STANDARD ENVIRONMENTAL RECORDS

Federal NPL site list

NPL: National Priority List

National Priorities List (Superfund). The NPL is a subset of CERCLIS and identifies over 1,200 sites for priority cleanup under the Superfund Program. NPL sites may encompass relatively large areas. As such, EDR provides polygon coverage for over 1,000 NPL site boundaries produced by EPA's Environmental Photographic Interpretation Center (EPIC) and regional EPA offices.

Date of Government Version: 03/11/2019	Source: EPA
Date Data Arrived at EDR: 03/14/2019	Telephone: N/A
Date Made Active in Reports: 04/01/2019	Last EDR Contact: 04/18/2019
Number of Days to Update: 18	Next Scheduled EDR Contact: 07/15/2019
	Data Release Frequency: Quarterly

Proposed NPL: Proposed National Priority List Sites

A site that has been proposed for listing on the National Priorities List through the issuance of a proposed rule in the Federal Register. EPA then accepts public comments on the site, responds to the comments, and places on the NPL those sites that continue to meet the requirements for listing.

Date of Government Version: 03/11/2019	Source: EPA
Date Data Arrived at EDR: 03/14/2019	Telephone: N/A
Date Made Active in Reports: 04/01/2019	Last EDR Contact: 04/18/2019
Number of Days to Update: 18	Next Scheduled EDR Contact: 07/15/2019
	Data Release Frequency: Quarterly

NPL LIENS: Federal Superfund Liens

Federal Superfund Liens. Under the authority granted the USEPA by CERCLA of 1980, the USEPA has the authority to file liens against real property in order to recover remedial action expenditures or when the property owner received notification of potential liability. USEPA compiles a listing of filed notices of Superfund Liens.

Federal Delisted NPL site list

Delisted NPL: National Priority List Deletions

The National Oil and Hazardous Substances Pollution Contingency Plan (NCP) establishes the criteria that the EPA uses to delete sites from the NPL. In accordance with 40 CFR 300.425.(e), sites may be deleted from the NPL where no further response is appropriate.

SEMS: Superfund Enterprise Management System

SEMS (Superfund Enterprise Management System) tracks hazardous waste sites, potentially hazardous waste sites, and remedial activities performed in support of EPA's Superfund Program across the United States. The list was formerly known as CERCLIS, renamed to SEMS by the EPA in 2015. The list contains data on potentially hazardous waste sites that have been reported to the USEPA by states, municipalities, private companies and private persons, pursuant to Section 103 of the Comprehensive Environmental Response, Compensation, and Liability Act (CERCLA). This dataset also contains sites which are either proposed to or on the National Priorities List (NPL) and the sites which are in the screening and assessment phase for possible inclusion on the NPL.

Federal CERCLIS NFRAP site list

SEMS-ARCHIVE: Superfund Enterprise Management System Archive

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

SEMS-ARCHIVE (Superfund Enterprise Management System Archive) tracks sites that have no further interest under the Federal Superfund Program based on available information. The list was formerly known as the CERCLIS-NFRAP, renamed to SEMS ARCHIVE by the EPA in 2015. EPA may perform a minimal level of assessment work at a site while it is archived if site conditions change and/or new information becomes available. Archived sites have been removed and archived from the inventory of SEMS sites. Archived status indicates that, to the best of EPA's knowledge, assessment at a site has been completed and that EPA has determined no further steps will be taken to list the site on the National Priorities List (NPL), unless information indicates this decision was not appropriate or other considerations require a recommendation for listing at a later time. The decision does not necessarily mean that there is no hazard associated with a given site; it only means that, based upon available information, the location is not judged to be potential NPL site.

Federal RCRA non-CORRACTS TSD facilities list

RCRA-TSDF: RCRA - Treatment, Storage and Disposal

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Transporters are individuals or entities that move hazardous waste from the generator offsite to a facility that can recycle, treat, store, or dispose of the waste. TSDFs treat, store, or dispose of the waste.

State- and tribal - equivalent CERCLIS

SHWS: Known Contaminated Sites in New Jersey

The Known Contaminated Sites in New Jersey includes sites under the purview of the Site Remediation Program which have contamination present at levels greater than the applicable cleanup criteria for soil and/or groundwater standards. The sites appearing in Known Contaminated Sites in New Jersey are classified as either active, where the site is assigned to a specific remedial program area, or pending, where the site is awaiting assignment to a specific remedial program area. Sites where no further action (NFA) designation has been given are not included in this report unless there are other areas of identified contamination which have not been remediated. This report includes sites being remediated under all of the various regulatory programs administered by the Site Remediation Program such as: Federal Superfund Program, Federal Resource Conservation and Recovery Act (RCRA), New Jersey's Industrial Site Recovery Act (ISRA), New Jersey's Underground Storage of Hazardous Substances Act, New Jersey's Spill Compensation and Control Act, New Jersey's Solid Waste Management Act, New Jersey's Water Pollution Control Act.

HWS RE-EVAL: Site Re-Evaluation Report

The locations were removed from the Known Contaminated Sites list for a variety of reasons. Some of the sites were taken off the list because they were inactive, some were not assigned a case worker and some were no longer contaminated. Inspectors from the DEP are now undertaking a full re-evaluation of each of the locations statewide. That includes visual and environmental tests to see whether contamination still exists.

Date of Government Version: 09/20/2007

HIST HWS: Known Contaminated Sites Listing

The Known Contaminated Sites in New Jersey report is a municipal listing of sites where contamination of soil and/or ground water is confirmed at levels greater than the applicable cleanup criteria or standards. Remedial activities are underway or required at the sites with an on-site source(s) of contamination and at locations where the source(s) of contamination is unknown. Sites with completed remedial work that require engineering and/or institutional controls have reporting measures in place to ensure the effectiveness of past actions, and some include maintenance and/or monitoring

ADDITIONAL ENVIRONMENTAL RECORDS

Local Brownfield lists

US BROWNFIELDS: A Listing of Brownfields Sites

Brownfields are real property, the expansion, redevelopment, or reuse of which may be complicated by the presence or potential presence of a hazardous substance, pollutant, or contaminant. Cleaning up and reinvesting in these properties takes development pressures off of undeveloped, open land, and both improves and protects the environment. Assessment, Cleanup and Redevelopment Exchange System (ACRES) stores information reported by EPA Brownfields grant recipients on brownfields properties assessed or cleaned up with grant funding as well as information on Targeted Brownfields Assessments performed by EPA Regions. A listing of ACRES Brownfield sites is obtained from Cleanups in My Community. Cleanups in My Community provides information on Brownfields properties for which information is reported back to EPA, as well as areas served by Brownfields grant programs.

Local Land Records

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

LIENS: Environmental LIENS

A listing of properties with environmental liens. The listing includes sites from the Site Remediation & Waste Management Program Sites where the Department has placed either a 1st Priority or Regular Spill Fund Lien against. 1st Priority Type Lien - a lien placed against the property where the discharge occurred providing that the owners of the property have some responsibility towards the discharge. First Priority Lien is superior to other types of liens. Non-Priority (Regular) Type Lien - a lien placed against the Responsible Party & their revenues and all real and personal property, other than the real property comprising the location of the discharge.

EPA WATCH LIST: EPA WATCH LIST

EPA maintains a "Watch List" to facilitate dialogue between EPA, state and local environmental agencies on enforcement matters relating to facilities with alleged violations identified as either significant or high priority. Being on the Watch List does not mean that the facility has actually violated the law only that an investigation by EPA or a state or local environmental agency has led those organizations to allege that an unproven violation has in fact occurred. Being on the Watch List does not represent a higher level of concern regarding the alleged violations that were detected, but instead indicates cases requiring additional dialogue between EPA, state and local agencies - primarily because of the length of time the alleged violation has gone unaddressed or unresolved.

2020 COR ACTION: 2020 Corrective Action Program List

The EPA has set ambitious goals for the RCRA Corrective Action program by creating the 2020 Corrective Action Universe. This RCRA cleanup baseline includes facilities expected to need corrective action. The 2020 universe contains a wide variety of sites. Some properties are heavily contaminated while others were contaminated but have since been cleaned up. Still others have not been fully investigated yet, and may require little or no remediation. Inclusion in the 2020 Universe does not necessarily imply failure on the part of a facility to meet its RCRA obligations.

RMP: Risk Management Plans

When Congress passed the Clean Air Act Amendments of 1990, it required EPA to publish regulations and guidance for chemical accident prevention at facilities using extremely hazardous substances. The Risk Management Program Rule (RMP Rule) was written to implement Section 112(r) of these amendments. The rule, which built upon existing industry codes and standards, requires companies of all sizes that use certain flammable and toxic substances to develop a Risk Management Program, which includes a(n): Hazard assessment that details the potential effects of an accidental release, an accident history of the last five years, and an evaluation of worst-case and alternative accidental releases; Prevention program that includes safety precautions and maintenance, monitoring, and employee training measures; and Emergency response program that spells out emergency health care, employee training measures and procedures for informing the public and response agencies (e.g the fire department) should an accident occur.

RAATS: RCRA Administrative Action Tracking System

RCRA Administration Action Tracking System. RAATS contains records based on enforcement actions issued under RCRA pertaining to major violators and includes administrative and civil actions brought by the EPA. For administration actions after September 30, 1995, data entry in the RAATS database was discontinued. EPA will retain a copy of the database for historical records. It was necessary to terminate RAATS because a decrease in agency resources made it impossible to continue to update the information contained in the database.

HIST FTTS: FIFRA/TSCA Tracking System Administrative Case Listing

A complete administrative case listing from the FIFRA/TSCA Tracking System (FTTS) for all ten EPA regions. The information was obtained from the National Compliance Database (NCDB). NCDB supports the implementation of FIFRA (Federal Insecticide, Fungicide, and Rodenticide Act) and TSCA (Toxic Substances Control Act). Some EPA regions are now closing out records. Because of that, and the fact that some EPA regions are not providing EPA Headquarters with updated records, it was decided to create a HIST FTTS database. It included records that may not be included in the newer FTTS database updates. This database is no longer updated.

Date of Government Version: 10/19/2006	Source: Environmental Protection Agency
Date Data Arrived at EDR: 03/01/2007	Telephone: 202-564-2501
Date Made Active in Reports: 04/10/2007	Last EDR Contact: 12/17/2007

UMTRA: Uranium Mill Tailings Sites

Uranium ore was mined by private companies for federal government use in national defense programs. When the mills shut down, large piles of the sand-like material (mill tailings) remain after uranium has been extracted from the ore. Levels of human exposure to radioactive materials from the piles are low; however, in some cases tailings were used as construction materials before the potential health hazards of the tailings were recognized.

US AIRS (AFS): Aerometric Information Retrieval System Facility Subsystem (AFS)

The database is a sub-system of Aerometric Information Retrieval System (AIRS). AFS contains compliance data on air pollution point sources regulated by the U.S. EPA and/or state and local air regulatory agencies. This information comes from source reports by various stationary sources of air pollution, such as electric power plants, steel mills, factories, and universities, and provides information about the air pollutants they produce. Action, air program, air program pollutant, and general level plant data. It is used to track emissions and compliance data from industrial plants.

ABANDONED MINES: Abandoned Mines

An inventory of land and water impacted by past mining (primarily coal mining) is maintained by OSMRE to provide information needed to implement the Surface Mining Control and Reclamation Act of 1977 (SMCRA). The inventory contains information on the location, type, and extent of AML impacts, as well as, information on the cost associated with the reclamation of those problems. The inventory is based upon field surveys by State, Tribal, and OSMRE program officials. It is dynamic to the extent that it is modified as new problems are identified and existing problems are reclaimed.

GW CONTAM AREAS: Groundwater Contamination Areas

This data identifies those sites where groundwater contamination has been identified and, where appropriate, the NJDEP has established a Classification Exception Area (CEA). CEAs are institutional controls in geographically defined areas within which the New Jersey Ground Water Quality Standards (NJGWQS) for specific contaminants have been exceeded. When a CEA is designated for an area, the constituent standards and designated aquifer uses are suspended for the term of the CEA. This data layer contains information about areas in the state which are specified as the Currently Known Extent (CKE) of ground water pollution. CKE areas are geographically defined areas within which the local ground water resources are known to be compromised because the water quality exceeds drinking water and ground water quality standards for specific contaminants.

ISRA: ISRA Database

The ISRA process begins with determining if the Act applies to your type of business and transaction. The provisions of ISRA only apply to industrial establishments. What is an industrial establishment? The term "industrial establishment" refers to the type of business operations and transactions that would subject a facility to review under ISRA. An industrial establishment must meet each of the following three criteria: The place of business or real property at which such business is conducted, having a North American Industry Classification System (NAICS) code listed in N.J.A.C. 7:26 B - Appendix C subject to the specified exceptions and limitations. The place of business must have been engaged in operations on or after December 31, 1983; and The place of business must involve the generation, manufacture, refining, transportation, treatment, storage, handling, or disposal of hazardous substances or hazardous wastes.

EDR HIGH RISK HISTORICAL RECORDS

EDR Exclusive Records

EDR MGP: EDR Proprietary Manufactured Gas Plants

The EDR Proprietary Manufactured Gas Plant Database includes records of coal gas plants (manufactured gas plants) compiled by EDR's researchers. Manufactured gas sites were used in the United States from the 1800's to 1950's to produce a gas that could be distributed and used as fuel. These plants used whale oil, rosin, coal, or a mixture of coal, oil, and water that also produced a significant amount of waste. Many of the byproducts of the gas production, such as coal tar (oily waste containing volatile and non-volatile chemicals), sludges, oils and other compounds are potentially hazardous to human health and the environment. The byproduct from this process was frequently disposed of directly at the plant site and can remain or spread slowly, serving as a continuous source of soil and groundwater contamination.

EDR Hist Auto: EDR Exclusive Historical Auto Stations

EDR has searched selected national collections of business directories and has collected listings of potential gas station/filling station/service station sites that were available to EDR researchers. EDR's review was limited to those categories of sources that might, in EDR's opinion, include gas station/filling station/service station establishments. The categories reviewed included, but were not limited to gas, gas station, gasoline station, filling station, auto, automobile repair, auto service station, service station, etc. This database falls within a category of information EDR classifies as "High Risk Historical Records", or HRHR. EDR's HRHR effort presents unique and sometimes proprietary data about past sites and operations that typically create environmental concerns, but may not show up in current government records searches.

EDR Hist Cleaner: EDR Exclusive Historical Cleaners

EDR has searched selected national collections of business directories and has collected listings of potential dry cleaner sites that were available to EDR researchers. EDR's review was limited to those categories of sources that might, in EDR's opinion, include dry cleaning establishments. The categories reviewed included, but were not limited to dry cleaners, cleaners, laundry, laundromat, cleaning/laundry, wash & dry etc. This database falls within a category of information EDR classifies as "High Risk Historical Records", or HRHR. EDR's HRHR effort presents unique and sometimes proprietary data about past sites and operations that typically create environmental concerns, but may not show up in current government records searches.

OTHER DATABASE(S)

Depending on the geographic area covered by this report, the data provided in these specialty databases may or may not be complete. For example, the existence of wetlands information data in a specific report does not mean that all wetlands in the area covered by the report are included. Moreover, the absence of any reported wetlands information does not necessarily mean that wetlands do not exist in the area covered by the report.

CT MANIFEST: Hazardous Waste Manifest Data

Facility and manifest data. Manifest is a document that lists and tracks hazardous waste from the generator through transporters to a tsd facility.

Sensitive Receptors: There are individuals deemed sensitive receptors due to their fragile immune systems and special sensitivity to environmental discharges. These sensitive receptors typically include the elderly, the sick, and children. While the location of all sensitive receptors cannot be determined, EDR indicates those buildings and facilities - schools, daycares, hospitals, medical centers, and nursing homes - where individuals who are sensitive receptors are likely to be located.

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

AHA Hospitals:

Version Date:	2014

EDR's GeoCheck Physical Setting Source Addendum is provided to assist the environmental professional in forming an opinion about the impact of potential contaminant migration.

Assessment of the impact of contaminant migration generally has two principle investigative components:

1. Groundwater flow direction, and
2. Groundwater flow velocity.

Groundwater flow direction may be impacted by surface topography, hydrology, hydrogeology, characteristics of the soil, and nearby wells. Groundwater flow velocity is generally impacted by the nature of the geologic strata.

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

GROUNDWATER FLOW DIRECTION INFORMATION

Groundwater flow direction for a particular site is best determined by a qualified environmental professional using site-specific well data. If such data is not reasonably ascertainable, it may be necessary to rely on other sources of information, such as surface topographic information, hydrologic information, hydrogeologic data collected on nearby properties, and regional groundwater flow information (from deep aquifers).

TOPOGRAPHIC INFORMATION

Surface topography may be indicative of the direction of surficial groundwater flow. This information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

TARGET PROPERTY TOPOGRAPHY

General Topographic Gradient: General ENE

SURROUNDING TOPOGRAPHY: ELEVATION PROFILES

Source: Topography has been determined from the USGS 7.5' Digital Elevation Model and should be evaluated on a relative (not an absolute) basis. Relative elevation information between sites of close proximity should be field verified.

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

HYDROLOGIC INFORMATION

Surface water can act as a hydrologic barrier to groundwater flow. Such hydrologic information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

Refer to the Physical Setting Source Map following this summary for hydrologic information (major waterways and bodies of water).

FEMA FLOOD ZONE

<u>Flood Plain Panel at Target Property</u>	<u>FEMA Source Type</u>

NATIONAL WETLAND INVENTORY

<u>NWI Quad at Target Property</u>	<u>NWI Electronic Data Coverage</u>
ASBURY PARK	YES - refer to the Overview Map and Detail Map

HYDROGEOLOGIC INFORMATION

Hydrogeologic information obtained by installation of wells on a specific site can often be an indicator of groundwater flow direction in the immediate area. Such hydrogeologic information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

Site-Specific Hydrogeological Data*:

Search Radius:	1.25 miles
Location Relative to TP:	1/2 - 1 Mile SSW
Site Name:	East Coast Ice Company
Site EPA ID Number:	NJD986570034
Groundwater Flow Direction:	GENERALLY SE.
Measured Depth to Water:	approximately 3.5 feet.
Hydraulic Connection:	Confining beds separate the multiple aquifers underlying the site.
Sole Source Aquifer:	No information about a sole source aquifer is available
Data Quality:	Information based on site-specific subsurface investigations is documented in the CERCLIS investigation report(s)

AQUIFLOW®

Search Radius: 1.000 Mile.

EDR has developed the AQUIFLOW Information System to provide data on the general direction of groundwater flow at specific points. EDR has reviewed reports submitted by environmental professionals to regulatory authorities at select sites and has extracted the date of the report, groundwater flow direction as determined hydrogeologically, and the depth to water table.

<u>MAP ID</u>	<u>LOCATION FROM TP</u>	<u>GENERAL DIRECTION GROUNDWATER FLOW</u>
Not Reported		

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

GROUNDWATER FLOW VELOCITY INFORMATION

Groundwater flow velocity information for a particular site is best determined by a qualified environmental professional using site specific geologic and soil strata data. If such data are not reasonably ascertainable, it may be necessary to rely on other sources of information, including geologic age identification, rock stratigraphic unit and soil characteristics data collected on nearby properties and regional soil information. In general, contaminant plumes move more quickly through sandy-gravelly types of soils than silty-clayey types of soils.

GEOLOGIC INFORMATION IN GENERAL AREA OF TARGET PROPERTY

Geologic information can be used by the environmental professional in forming an opinion about the relative speed at which contaminant migration may be occurring.

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

DOMINANT SOIL COMPOSITION IN GENERAL AREA OF TARGET PROPERTY

The U.S. Department of Agriculture's (USDA) Soil Conservation Service (SCS) leads the National Cooperative Soil Survey (NCSS) and is responsible for collecting, storing, maintaining and distributing soil survey information for privately owned lands in the United States. A soil map in a soil survey is a representation of soil patterns in a landscape. The following information is based on Soil Conservation Service SSURGO data.

Soil Map ID: 1

Soil Component Name: Urban land

Soil Surface Texture:
Hydrologic Group: Not reported

Soil Drainage Class:
Hydric Status: Unknown

Corrosion Potential - Uncoated Steel: Not Reported

Depth to Bedrock Min: > 0 inches

Depth to Watertable Min: > 0 inches

No Layer Information available.

Soil Map ID: 2

Soil Component Name: Evesboro

Soil Surface Texture: sand

Hydrologic Group: Class A - High infiltration rates. Soils are deep, well drained to excessively drained sands and gravels.

Soil Drainage Class: Excessively drained

Hydric Status: Not hydric

Corrosion Potential - Uncoated Steel: Low

Depth to Bedrock Min: > 0 inches

Depth to Watertable Min: > 0 inches

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

Soil Layer Information							
Layer	Boundary		Soil Texture Class	Classification		Saturated hydraulic conductivity micro m/sec	Soil Reaction (pH)
	Upper	Lower		AASHTO Group	Unified Soil		
1	0 inches	3 inches	sand	Granular materials (35 pct. or less passing No. 200), Silty, or Clayey Gravel and Sand.	COARSE-GRAINED SOILS, Sands, Sands with fines, Silty Sand.	Max: 141.14 Min: 14.11	Max: 5 Min: 3.6
2	3 inches	16 inches	sand	Granular materials (35 pct. or less passing No. 200), Silty, or Clayey Gravel and Sand.	COARSE-GRAINED SOILS, Sands, Sands with fines, Silty Sand.	Max: 141.14 Min: 14.11	Max: 5 Min: 3.6
3	16 inches	31 inches	sand	Granular materials (35 pct. or less passing No. 200), Silty, or Clayey Gravel and Sand.	COARSE-GRAINED SOILS, Sands, Sands with fines, Silty Sand.	Max: 141.14 Min: 14.11	Max: 5 Min: 3.6
4	31 inches	79 inches	stratified loamy sand to sand	Granular materials (35 pct. or less passing No. 200), Silty, or Clayey Gravel and Sand.	COARSE-GRAINED SOILS, Sands, Sands with fines, Silty Sand.	Max: 141.14 Min: 14.11	Max: 5 Min: 3.6

PHYSICAL SETTING SOURCE RECORDS SEARCHED

TOPOGRAPHIC INFORMATION

USGS 7.5' Digital Elevation Model (DEM)

Source: United States Geologic Survey

EDR acquired the USGS 7.5' Digital Elevation Model in 2002 and updated it in 2006. The 7.5 minute DEM corresponds to the USGS 1:24,000- and 1:25,000-scale topographic quadrangle maps. The DEM provides elevation data with consistent elevation units and projection.

Current USGS 7.5 Minute Topographic Map

Source: U.S. Geological Survey

HYDROLOGIC INFORMATION

Flood Zone Data: This data was obtained from the Federal Emergency Management Agency (FEMA). It depicts 100-year and 500-year flood zones as defined by FEMA. It includes the National Flood Hazard Layer (NFHL) which incorporates Flood Insurance Rate Map (FIRM) data and Q3 data from FEMA in areas not covered by NFHL.

Source: FEMA

Telephone: 877-336-2627

Date of Government Version: 2003, 2015

NWI: National Wetlands Inventory. This data, available in select counties across the country, was obtained by EDR in 2002, 2005 and 2010 from the U.S. Fish and Wildlife Service.

State Wetlands Data: Wetlands Inventory

Telephone: 609-984-2243

HYDROGEOLOGIC INFORMATION

AQUIFLOW^R Information System

Source: EDR proprietary database of groundwater flow information

EDR has developed the AQUIFLOW Information System (AIS) to provide data on the general direction of groundwater flow at specific points. EDR has reviewed reports submitted to regulatory authorities at select sites and has extracted the date of the report, hydrogeologically determined groundwater flow direction and depth to water table information.

GEOLOGIC INFORMATION

Geologic Age and Rock Stratigraphic Unit

Source: P.G. Schruben, R.E. Arndt and W.J. Bawiec, Geology of the Conterminous U.S. at 1:2,500,000 Scale - A digital representation of the 1974 P.B. King and H.M. Beikman Map, USGS Digital Data Series DDS - 11 (1994).

STATSGO: State Soil Geographic Database

Source: Department of Agriculture, Natural Resources Conservation Service (NRCS)

The U.S. Department of Agriculture's (USDA) Natural Resources Conservation Service (NRCS) leads the national Conservation Soil Survey (NCSS) and is responsible for collecting, storing, maintaining and distributing soil survey information for privately owned lands in the United States. A soil map in a soil survey is a representation of soil patterns in a landscape. Soil maps for STATSGO are compiled by generalizing more detailed (SSURGO) soil survey maps.

SSURGO: Soil Survey Geographic Database

Source: Department of Agriculture, Natural Resources Conservation Service (NRCS)

Telephone: 800-672-5559

SSURGO is the most detailed level of mapping done by the Natural Resources Conservation Service, mapping scales generally range from 1:12,000 to 1:63,360. Field mapping methods using national standards are used to construct the soil maps in the Soil Survey Geographic (SSURGO) database. SSURGO digitizing duplicates the original soil survey maps. This level of mapping is designed for use by landowners, townships and county natural resource planning and management.

APPENDIX D: QUALIFICATIONS/INSURANCE

Education

B.S., Marine and Environmental Biology and Science, Monmouth University

M.S., Land Resources and Environmental Science, Montana State University at Bozeman (Online)

Training

Phase I ESA training at Partner ESI headquarters in Torrance, CA., September 2015. Refresher May 2016

Highlights

2 years in the Environmental and Due Diligence Field

2 years performing Phase I Environmental Site Assessments (ESA), Environmental Desktop Records Reviews and Transaction Screen Assessments (TSA)

2 years of performing Records Research and Regulatory File Reviews

1 year experience with multifamily, office and retail properties

Experience Summary

Ms. Rodenberg currently holds the role of Staff Assessor I in the east region. Responsibilities include completing Environmental Desktop Reports and Phase I Environmental Site Assessments for a variety of clients during the commercial real estate transaction process. Ms. Rodenberg is familiar with the guidelines of the ASTM Standards and US Environmental Protection Agency's All Appropriate Inquiry (AAI), as well as customized formats, in order to exceed expectations in providing accurate and thorough site assessments for clients.

Ms. Rodenberg has generated Phase I ESA and TSA reports for a variety of commercial properties including multi-family apartment building and complexes, warehouses, retail spaces, institutions such as schools, small as well as high-rise office buildings and vacant land in the states of New Jersey, New York, Pennsylvania, Connecticut, Maryland and Delaware. Ms. Rodenberg works closely with state and local regulatory agencies to obtain environmentally significant documents regarding LUST incidents, tank removal and subsurface investigations performed on-site or on adjacent properties. Ms. Rodenberg has approximately one years' experience conducting Phase I Environmental Assessments and Transaction Screen Assessments.

Project Experience

Ms. Rodenberg has one and a half years' experience with a variety of project types including multifamily, offices, commercial retailers, institutional and warehouses in both rural, suburban and highly developed areas. Below are some notable projects Ms. Rodenberg has performed.

Institutional, Middlebury, Connecticut. Phase I Environmental Site Assessment of a 13 building all girl's boarding school campus, totaling approximately 81.26 Acres. Buildings included classrooms, athletic halls and residential facilities.

Mixed Use Commercial and Office, Brooklyn, New York. Phase I Environmental Site Assessment of a 551,143 square foot mixed use commercial and office building, occupied with 137 office tenants and 6 retail tenants.

Taylor Rodenberg

Apartment Complex, White Plains, New York. Phase I Environmental Site Assessment of a 300,000 square foot, seven building garden-style apartment complex.

Auto Repair, Philadelphia, Pennsylvania. Phase I Environmental Site Assessment of an auto repair facility in which the previous use of the property as an auto repair facility and machine shop was identified as a Recognized Environmental Condition (REC) and was followed up by a Phase II subsurface investigation.

Assisted Living Facility, Frederick and Walkerville, Maryland. Phase I Environmental Site Assessment of two assisted living facilities as part of a 45 site portfolio.

Speaking

Carbon Sequestration of Native and Invaded Dunes, Ecological Society of America (ESA), Elizabethtown College, PA. April 2015. Poster presentation of Honors Thesis project.

Carbon Sequestration of Native and Invaded Dunes, Monmouth University School of Science Research Symposium, Monmouth University, NJ. May 2015. Poster presentation of Honors Thesis project.

Registrations

National Radon Proficiency Program (NRPP) – Residential Measurement Provider

State of New Jersey – Radon Measurement Technician

State of Pennsylvania – Radon Testing Firm Employee

Highlights

Phase I Environmental Site Assessments

Transaction Screen Assessments

Environmental Desktop Reports

Experience Summary

Ms. Kelly has experience completing due diligence assessments for a variety of property types according to the needs and requirements of a varied number of reporting standards, including American Society of Testing and Materials (ASTM) standards, US Environmental Protection Agency's All Appropriate Inquiry (AAI), and customized client formats. Ms. Kelly's responsibilities include completing and reviewing Phase I Environmental Site Assessments, Transactions Screen Assessments, and Environmental Desktop Reports for an array of residential, commercial, industrial and municipal properties.

Project Experience

Ms. Kelly has experience performing due diligence assessments for a variety of property types including multi-family residences, commercial buildings, retail shopping centers, auto repair facilities, self-storage facilities and light-manufacturing facilities.

Auto Repair, Breinigsville, Pennsylvania. Ms. Kelly performed a Phase I Environmental Site Assessment for a 3 acre auto repair center.

Multi-family Apartment Complex, New York City, New York. Ms. Kelly performed a Phase I Environmental Site Assessment for a 50-story multi-family structure, formerly occupied by a gasoline service station.

Commercial Plaza, Springfield, Pennsylvania. Ms. Kelly performed a Phase I Environmental Site Assessment for a shopping center with a dry cleaning tenant.

Music and Art Studio, Jersey City, New Jersey. Ms. Kelly performed a Phase I Environmental Site Assessment for a music and art studio, formerly occupied by an industrial facility.

Former Community Dump, Glen Cove, New York. Ms. Kelly performed a Phase I Environmental Site Assessment on a former community dump, which was identified in the Federal Superfund Enterprise Management System.

Storage Facility, Egg Harbor Township, New Jersey. Ms. Kelly performed a Phase I Environmental Site Assessment for a 6.46 acre storage facility, containing 753 units.

Multi-family Apartment Complex, Long Branch, New Jersey. Ms. Kelly performed a Phase I Environmental Site Assessment for a 21.62 acre apartment complex, formerly equipped with 24 underground storage tanks.

Mixed Commercial and Office Building, Brooklyn, New York. Ms. Kelly performed a Phase I Environmental Site Assessment for a mixed commercial and office building, formerly occupied by various auto facilities.

Industrial Warehouse, Freehold, New Jersey. Ms. Kelly performed a Phase I Environmental Site Assessment for a 4.34 acre industrial warehouse.

Health Care Facilities, Milford and Seaford, Delaware. Ms. Kelly conducted short-term radon sampling at two health care facilities.

Highlights

20 years of experience in the environmental, engineering, and industrial hygiene services industry
Experience with Fannie Mae and Freddie Mac
Property Condition Reports
Phase I Environmental Site Assessments

Experience Summary

Ms. Spinoso has 20 years of experience in the environmental, engineering, and industrial hygiene services industry. She has significant experience in due diligence assessments for a variety of property types and the needs and requirements of a number of reporting standards, including ASTM standards, EPA's All Appropriate Inquiry (AAI), Fannie Mae DUS, Freddie Mac, HUD, and customized client formats. Ms. Spinoso has been personally involved in the details of thousands of real estate transactions for various client types and understands the specific needs and scopes of work required for the different parties involved in the transaction.

Due Diligence Assessments

Specifically, Ms. Spinoso has conducted and managed:

- Property Condition Assessments (PCAs), Small Loan PCAs, and Construction Progress Monitoring reports
- Regulatory Compliance Assessments,
- Phase I Environmental Site Assessments (ESAs) and Environmental Transaction Screens,
- Vapor Intrusion Assessments,
- Asbestos Surveys, Lead-based Paint Surveys, Radon Studies, Mold Assessments, and Lead-in-water sampling and analysis.

Multifamily Policy and Assessments

As a national client manager for a Fortune 500 company, Ms. Spinoso worked directly as a consultant with the Fannie Mae DUS team to assess and refine Scopes of Work (SOWs) for Environmental Phase Is and Property Condition Reports and sat on information panels for Fannie Mae to introduce and implement the SOWs. On separate occasions, Ms. Spinoso was responsible for developing report templates to meet the Phase I ESA requirements of Fannie Mae's and Freddie Mac's DUS small loan programs.

Ms. Spinoso has conducted and managed hundreds of assessments of multifamily properties. She is highly experienced with the various reporting requirements of Fannie Mae, Freddie Mac, FHA/HUD Multifamily Accelerated Process (MAP) and HUD LEAN Healthcare due diligence projects. Ms. Spinoso was an integral component in the creation of Partner's HUD Due Diligence Services group.

CMBS and Portfolio Lender Experience

Early in her career, Ms. Spinoso worked with the major due diligence industry leader at the time and assisted the rating agencies in developing risk assessment requirements for Phase I ESAs and Property Condition Reports.

Ms. Spinoso served as a third party reviewer for Goldman Sachs. In this capacity, Ms. Spinoso reviewed all due diligence reports including Phase I ESAs, PNAs and PMLs and evaluated the risk of the assets. Ms. Spinoso interacted frequently with the Goldman Sachs credit team and various stakeholders to translate risk into plain language and work to keep a deal moving forward.

Ms. Spinoso has also directed due diligence programs for leading lenders' and investors' portfolios for clients such as Wells Fargo Bank, Bank of America and others. As a national client manager for a Fortune 500 company, Ms. Spinoso was responsible for managing due diligence projects and risk portfolios throughout the United States. She has consulted with various regional and national banks on developing Phase I ESA requirements and report templates.

Due Diligence Policy and Training

As a member in good standing with the American Society of Testing and Materials (ASTM) and an ESA Committee Member, she has provided expert opinion and is currently on the ASTM committee to consider revisions of the E1527 Phase I ESA standard. Ms. Spinoso has implemented due diligence training courses, researching, developing and presenting new industry guidelines for engineering and environmental property assessments.

Federal Programs and Compliance

Ms. Spinoso has reviewed and prepared due diligence assessments in support of FDIC contracts. As a Senior Program and Project Manager, Ms. Spinoso has conducted oversight of US Army Corp of Engineers projects for Flood Damage Reduction, Feasibility Studies, and GIS Structural Studies, as well as organized Capital Improvements Programs for municipalities.

She has managed environmental risk studies for the privatization of US Army bases and conducted hazardous materials training sessions for USPS.

As a National Client Manager, Ms. Spinoso also acted as liaison for the Corp of Engineers Southeast and Midwest contracts, conducting a wide array of environmental projects and programs.

Ms. Spinoso has also managed over 1200 risk assessments and spill prevention plans nationally for United Rentals, and assisted in the development of NEPA studies for clients to maintain national compliance.

Finally, Ms. Spinoso's diversity across residential, industrial, municipal, and commercial environments as well as her varied experience is a major contribution to Partner Engineering and Science's national team.
