

This past Friday the Monmouth County Health Board ran a vaccination clinic at our Fire House. Hundreds of area residents participated. We were fortunate to receive doses for the 5-11 year-old residents. Many thanks to both the Health Department and our team that managed this important event!

The newly formed Bradley Beach Mayors Wellness Committee has been working toward our first community event- The Mayors Wellness Walk. This will occur on Sunday, November 21st at 9:00 AM on the Promenade. Please sign-up on the website! It's free and registered walkers receive a reusable water bottle with the Wellness Campaign Logo.

Continuing on the topic of health and well being, Bradley Beach has formed a Mayors Wellness Committee to promote community health and assess strengths and areas for improvement. Two of our neighboring towns, Asbury Park and Freehold Borough were among 22 municipalities that achieved a status of "2020 Healthy Towns". Over 400 of the 554 municipalities are engaged.

I'm excited that we just approved the Newark Avenue repaving/ beautification contractor bid at the Council meeting Tuesday. This gives us the opportunity to improve a key street on the Northside of our town. This, along with our other infrastructure projects – the replacement of the boardwalk and Gazebos between Cliff and Newark Avenues and new handicap ramps, happening as we speak, the sump

pump remediation project, and the Library building water remediation, are moving us forward.
